OPERATING INSTRUCTIONS

Hydraulic Lift System:

To access the under-bed storage, gently lift the mattress platform from the foot end of the bed. The hydraulic mechanism will assist in lifting and holding the platform securely in the raised position. To lower, apply gentle downward pressure until the platform fully descends. Ensure the anti-falling device is engaged when the bed is raised for safety.

MAINTENANCE

To maintain the appearance and longevity of your iPormis bed frame, follow these care instructions:

- **Fabric Care:** The upholstered fabric should be dry cleaned only. Do not machine wash or tumble dry.
- **General Cleaning:** For routine cleaning, gently vacuum the fabric to remove dust and debris. For spills, blot immediately with a clean, dry cloth. Avoid harsh chemicals or abrasive cleaners.
- **Hydraulic System:** Periodically check the hydraulic pistons for smooth operation. If the lift becomes harder to operate over time, ensure no obstructions are present and that the mechanism is clean.
- **Frame Integrity:** Occasionally check all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability and prevent noise.

TROUBLESHOOTING

If you encounter any issues with your bed frame, please refer to the following common troubleshooting tips:

• **Hydraulic Lift Not Working/Stuck:**

- Ensure the mattress is properly positioned and not obstructing the mechanism.
- Verify that the hydraulic pistons are correctly installed and not damaged. If a piston appears faulty, contact customer support.
- Confirm that the mattress weight is within the specified lifting capacity (154 lbs Max Lifting Weight Capacity for the mattress).

• **Noise/Squeaking:**

- Check all assembly bolts and screws. Tighten any loose connections.
- Ensure slats are properly seated and not rubbing against the frame. The design includes noise-free foam to reduce friction.

• **Charging Station Not Functioning:**

- Verify that the charging station's power cord is securely plugged into a working wall outlet.
- Test the outlet with another device to confirm it has power.
- Ensure your device's charging cable is fully inserted into the USB or AC port.
