**iPormis 821B1-JW**

# iPormis Queen Size Lift Up Storage Bed Frame with Charging Station

Model: 821B1-JW

## 1. OVERVIEW

---

The iPormis Queen Size Lift Up Storage Bed Frame is designed to offer both comfort and practical storage solutions. This upholstered platform bed features a tufted headboard with an integrated charging station, a hydraulic lift system for under-bed storage, and a noise-free design. It is engineered for heavy-duty support without the need for a box spring and is designed for easy assembly.

## 2. SAFETY INFORMATION

---

### WARNING:

- Do not exceed the maximum weight recommendation of 1000 pounds for the bed frame.
- Always use the hydraulic lift system with caution to prevent injury or damage to the bed frame. Ensure hands and fingers are clear of moving parts when operating the lift mechanism.
- Keep children and pets away from the bed frame during operation of the hydraulic lift system.

## 3. PRODUCT FEATURES

---

- **Smart Modern Design:** Upholstered headboard with tufted detailing and an integrated charging station. The charging station includes 2 AC outlets, 1 USB-A port, and 1 Type-C port for convenient device charging.
- **Hydraulic Lift System:** Effortlessly raise the mattress platform to access ample under-bed storage space.

- **Heavy-Duty Support:** Constructed with robust wooden slats and a sturdy metal frame, supporting up to 1000 lbs. No box spring is required.
- **Noise-Free Operation:** Designed to eliminate traditional platform bed frame noises for a peaceful sleep environment.
- **Easy Assembly:** Simplified assembly process with included tools and clear instructions.

## 4. PACKAGE CONTENTS

Please ensure all components are present before beginning assembly:

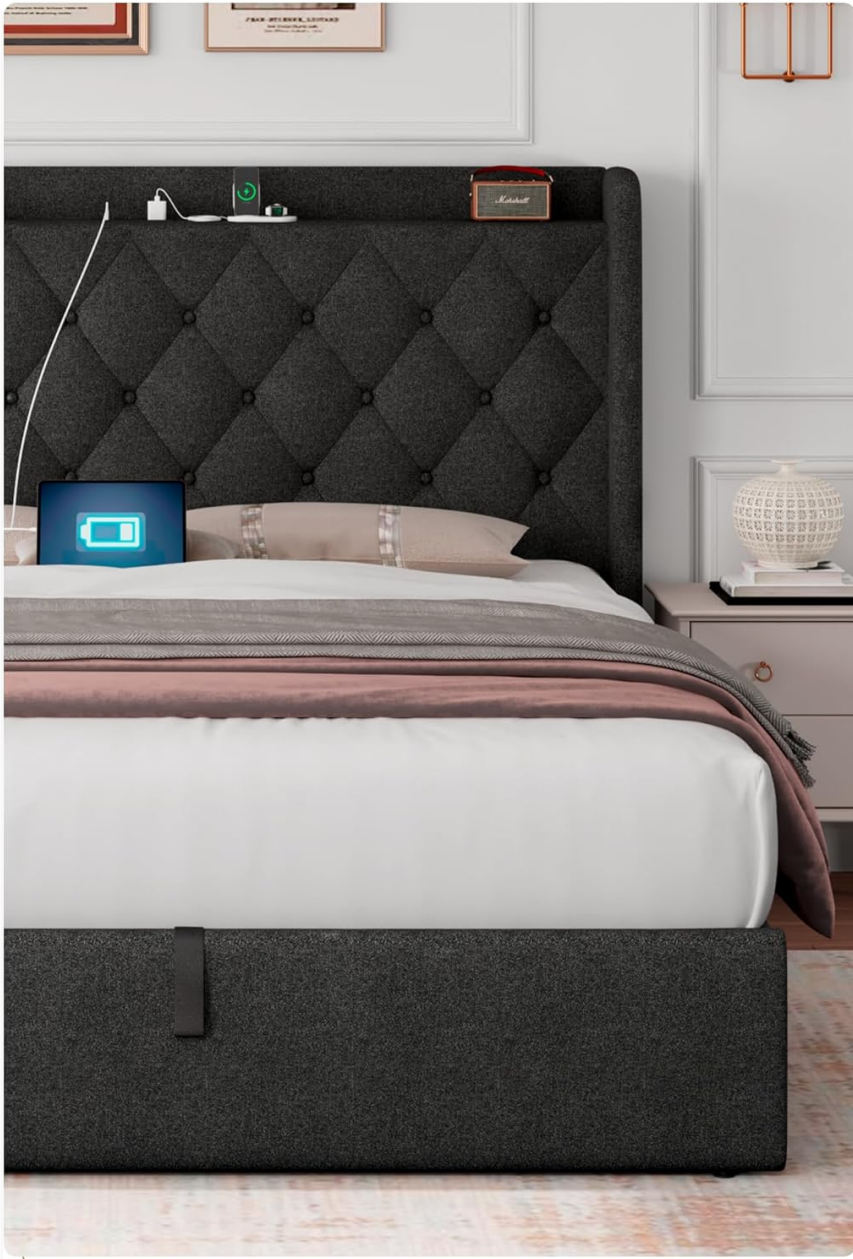

- Headboard with Charging Station
- Bed Frame Components (Side Rails, Footboard, Center Support)
- Wooden Slats
- Hydraulic Lifting Mechanism
- Installation Manual
- Toolkits (for assembly)

## 5. ASSEMBLY INSTRUCTIONS

This bed frame is designed for straightforward assembly. Please follow the detailed step-by-step instructions provided in the included Installation Manual. All necessary tools are supplied.

## Important Notes for Hydraulic System Activation:

1. After completing the bed frame assembly, place your mattress on top of the slat system.
2. Allow 15-30 minutes for the hydraulic system to settle with the mattress weight.
3. To lower the bed for the first time, apply firm downward pressure. It is recommended to press down while standing in the middle of the end of the bed. Applying pressure only on the edge may not activate the mechanism correctly.
4. You may need to try pressing down multiple times until the hydraulic pistons begin to compress and lower the bed.

## 6. OPERATING INSTRUCTIONS

### 6.1. Hydraulic Lift System

To access the under-bed storage, firmly grasp the fabric pull handle located at the foot of the bed. Lift the mattress platform upwards. The hydraulic system will assist in lifting and holding the platform in an open position. To close, gently pull the platform downwards until it rests securely on the frame.

## 6.2. Charging Station

The integrated charging station on the headboard provides convenient power access. Simply plug your devices into the available 2 AC outlets, 1 USB-A port, or 1 Type-C port. Ensure the bed frame is connected to a power source.

## 7. MAINTENANCE

---

- **Fabric Care:** The upholstered fabric should be dry cleaned only. For minor spills, gently blot with a clean, damp cloth. Avoid harsh chemicals.
- **Frame Care:** Regularly check all bolts and screws to ensure they are tight. Tighten as needed to maintain stability and prevent noise.
- **Hydraulic System:** Periodically inspect the hydraulic pistons for any signs of wear or damage. If the system becomes stiff, a small amount of oil can be applied to the telescopic part of the air pressure rod.
- **Charging Station:** Keep the charging ports free of dust and debris. Do not overload the outlets.

## 8. TROUBLESHOOTING

---

### 8.1. Hydraulic System Not Lowering/Operating Smoothly

If the hydraulic system does not lower easily or seems stiff after initial assembly:

1. Confirm the correct installation of the hydraulic rods. The thicker part should face upwards.
2. Ensure the mattress is placed on the bed frame. The system requires the weight of the mattress to function correctly.
3. Allow 15-30 minutes after placing the mattress for the system to settle.
4. Apply firm downward pressure, standing in the middle of the foot end of the bed. Avoid pressing only on the edges.
5. Repeat the downward pressure multiple times if necessary until the pistons begin to compress.
6. If issues persist, contact customer support.

### 8.2. Squeaking Noises

If the bed frame produces squeaking noises:

- Check all assembly bolts and screws and tighten them securely.
- Ensure the wooden slats are properly seated in their designated positions.
- The bed frame is designed with EVA material for noise immunity; however, loose connections can cause sound.

## 9. SPECIFICATIONS

---

Feature	Detail
Brand	iPormis

Model Number	821B1-JW
Size	Queen
Color	Dark Grey
Product Dimensions	85.5"L x 63"W x 46"H
Material	Fabric & Wood & Iron
Weight Capacity	1000 lbs
Under-bed Storage Height	10.8 inches
Charging Station	2 AC Outlets, 1 USB-A, 1 Type-C
