

Reobrix 66016

Reobrix 66016 Notre Dame de Paris Building Kit

Instruction Manual

1. INTRODUCTION

This instruction manual provides essential information for the assembly, display, and care of your Reobrix 66016 Notre Dame de Paris building kit. This large-scale architectural model, comprising 8868 pieces, allows for the detailed construction of the iconic Notre Dame de Paris cathedral. Designed for enthusiasts and collectors, this kit offers a rewarding building experience and results in an impressive display piece.

The model features an elegant appearance with exquisite details, including numerous decorative elements that faithfully restore the architectural nuances of the real-world landmark. It is constructed from high-quality, BPA-free plastic materials, ensuring durability and safety. This kit is recommended for individuals aged 14 years and older.

2. SETUP AND ASSEMBLY

The Reobrix 66016 kit contains 8868 building pieces. Careful attention to the assembly process is crucial for a successful and stable model. Please follow the step-by-step instructions provided in the physical instruction booklet included with your kit.

2.1. Preparation

- **Unpacking:** Carefully open the packaging and remove all bags of building blocks.
- **Sorting:** It is highly recommended to sort the pieces by type, color, or bag number as indicated in the instruction booklet. This will significantly streamline the assembly process.
- **Workspace:** Ensure you have a clean, spacious, and well-lit workspace to prevent loss of small parts and to comfortably manage the large number of pieces.

2.2. Assembly Process

1. Refer to the dedicated instruction manual provided in the box for detailed, illustrated steps.
2. Follow the sequence of steps precisely. Each section of the model is designed to be built in a specific order to ensure structural integrity.
3. Ensure each piece is firmly connected. The building blocks are designed for a strong clamp force.
4. Pay close attention to the orientation of pieces, especially for architectural details and window elements.
5. For complex sections, such as roofs or spires, it may be beneficial to assemble sub-sections separately before attaching them to the main structure.

3. DISPLAY AND HANDLING

Once assembled, the Reobrix 66016 Notre Dame de Paris model is intended for static display. Its impressive size and detailed design make it a prominent decorative piece.

3.1. Placement

- Choose a stable, flat surface for display, such as a table or shelf.
- Avoid areas prone to vibrations or accidental bumps.
- Keep the model away from direct sunlight to prevent potential discoloration of the plastic over time.
- Ensure the display location is away from excessive heat sources or extreme temperature fluctuations.

3.2. Handling

- When moving the model, support it from the base to distribute its weight evenly and prevent structural stress.

- Avoid lifting the model by delicate parts such as spires, towers, or roof sections.

4. MAINTENANCE

Regular maintenance will help preserve the appearance of your Reobrix 66016 model.

4.1. Cleaning

- Dust the model regularly using a soft, dry cloth or a soft-bristled brush.
- For more stubborn dirt, a slightly damp cloth can be used, followed immediately by a dry cloth. Avoid abrasive cleaners or harsh chemicals, as these can damage the plastic.

4.2. Storage

If the model needs to be stored, ensure it is placed in a protective container to prevent dust accumulation and damage. Disassembly is generally not recommended unless absolutely necessary, as repeated assembly and disassembly can wear down the connections.

5. TROUBLESHOOTING

This section addresses common issues that may arise during or after the assembly of your Reobrix 66016 model.

5.1. Missing Pieces

- Carefully re-check all packaging materials and your workspace. Small pieces can easily be overlooked.
- If pieces are genuinely missing, contact the retailer or Reobrix customer support for assistance. Provide the specific part numbers and quantities required, usually found in the instruction manual's parts list.

5.2. Structural Instability During Assembly

- Ensure all connections are pressed firmly together. A loose connection can compromise the stability of subsequent layers.
- Double-check the instruction manual to confirm that pieces are placed in the correct orientation and location.
- Some large models may feel less stable during intermediate building stages. The overall structure often gains rigidity as more layers and connecting elements are added.

5.3. Difficulty Connecting Pieces

- Ensure you are using the correct pieces as indicated in the manual.
- Apply firm, even pressure. Avoid forcing pieces, which could cause damage.

6. SPECIFICATIONS

Feature	Detail
Brand	Reobrix
Model Name	Reobrix 66016 Notre Dame de Paris Klemmbausteine MOC Modell
Model Number	66016
Number of Pieces	8868
