- **Doors do not close properly:** Check hinge alignment. Loosen hinge screws slightly, adjust the door position, and retighten. Ensure the cabinet is on a level surface.
- **Lock is stiff or not engaging:** Ensure the doors are fully closed before attempting to lock. Check if any items inside are obstructing the locking rods. Apply graphite lubricant to the keyhole if necessary.
- **Cabinet feels wobbly:** Verify that all assembly screws are tightened. Ensure the cabinet is placed on a level surface. Confirm the wall attachment device is securely installed.
