- Avoid dragging the desk when moving it; lift it to prevent damage to the legs and floor.

4. TROUBLESHOOTING

This section addresses common issues you might encounter with your desk.

4.1 Stability Issues (Wobbling)

- **Check Leg Levelers:** Ensure all adjustable feet pads are in full contact with the floor and adjusted to compensate for uneven surfaces.
- **Tighten Fasteners:** Verify that all assembly screws and bolts are securely tightened. Loose connections can lead to instability.

- **Even Weight Distribution:** Avoid placing excessively heavy items on one side of the desk. Distribute weight as evenly as possible.

- **Gentle Force:** When connecting components, apply gentle, even pressure. Avoid excessive force, particularly when inserting dowels, to prevent damage.

4.3 Power Outlets Not Working

- **Check Wall Outlet:** Ensure the desk's main power cord is securely plugged into a functional wall outlet.
