Pewkim Smart Bark Collar User Manual

Model: B0CHRV75Z9

INTRODUCTION

Thank you for choosing the Pewkim Smart Bark Collar. This device is designed to help train your dog to reduce excessive barking through humane and effective methods. It features adjustable sensitivity and multiple training modes, including beep, vibration, and static correction, suitable for various dog sizes and temperaments. Please read this manual carefully before use to ensure proper operation and the safety of your pet.

SETUP AND PREPARATION

Package Contents

Before beginning, please ensure all components are present in the package:

Inside the Box

Product List:

1. Device & Collar
2. Electric Shock Terminals
3. Test Board
4. Silicone Protective Covers
5. charging cable
6. Instructions for use

Image: A visual representation of the items included in the product box, such as the collar device, charging cable, test board, and silicone covers.

- 1 x Bark Collar Device & Adjustable Strap
- 2 x Electric Shock Terminals (if applicable to model)
- 1 x Test Board
- 2 x Silicone Protective Covers
- 1 x USB Charging Cable
- 1 x User Manual (this document)

Charging the Device

The collar features a long-lasting battery. Before first use, fully charge the device. A full charge typically takes approximately 1.5 hours and provides up to 20 days of working time, depending on usage.

Long Battery Life

Image: The bark collar connected to a USB charging cable, illustrating the charging process and highlighting its long battery life.

1. Connect the USB charging cable to the charging port on the collar.
2. Plug the other end of the cable into a standard USB power adapter (not included) or a computer USB port.
3. The indicator light on the collar will show charging status (refer to the device's display for specific indicators).
4. Once fully charged, disconnect the cable.

Fitting the Collar

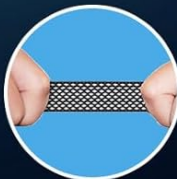

Proper fit is crucial for the collar's effectiveness and your dog's comfort. The adjustable nylon strap is suitable for dogs weighing 8-120 lbs with neck sizes ranging from 9 to 26 inches.

Adjustable Collar for All Sizes Dogs

Recommend Weight: 8-120 lbs.

Skin-friendly

Soft Strong & Durable

Image: The bark collar shown with various dog breeds, demonstrating its adjustable nature and suitability for different sizes, along with measurements for the strap.

1. Place the collar around your dog's neck, ensuring the main unit is positioned centrally on the underside of the neck.
2. Adjust the strap so that it is snug but not too tight. You should be able to fit one or two fingers comfortably between the collar and your dog's neck.
3. Ensure the contact points (if using static correction) are touching your dog's skin. If your dog has long fur, you may need to trim the fur slightly or use longer contact points (if provided) to ensure proper contact.
4. Check the fit regularly, especially for growing puppies.

OPERATING INSTRUCTIONS

Powering On/Off

Refer to the device's specific buttons for power control. Typically, a long press of the power button will turn the device on or off.

Understanding Training Modes

The Pewkim Smart Bark Collar offers 5 safe training modes to address different barking behaviors. These modes can be cycled through using the mode button on the device.

5 Safe Training Modes

NO SHOCK 

perfect **95%** dogs

 **Beep**

 **Vibration**

 **Beep + Vibration**

Safe SHOCK 

For more **Stubborn** dogs

 **Beep + Vibration + LOW Shock**

 **Beep + Vibration + HIGH Shock**

Image: The bark collar displaying icons for its five training modes: Beep, Vibration, Beep + Vibration, Beep + Vibration + LOW Shock, and Beep + Vibration + HIGH Shock.

- **Beep Only:** Emits an audible tone when barking is detected.
- **Vibration Only:** Delivers a gentle vibration when barking is detected.
- **Beep + Vibration:** Combines an audible tone with vibration.
- **Beep + Vibration + LOW Static Correction:** Combines beep, vibration, and a low level of static correction.
- **Beep + Vibration + HIGH Static Correction:** Combines beep, vibration, and a higher level of static correction.

It is recommended to start with the lowest intensity mode (Beep Only) and gradually increase if necessary, observing your dog's reaction.

Adjusting Sensitivity Levels

The collar features 7 adjustable sensitivity levels, allowing you to fine-tune how easily the collar detects your dog's bark. A higher sensitivity level means the collar will react to softer barks, while a lower level requires louder barks to trigger a response.

Image: A close-up of the bark collar's display showing the sensitivity level indicator, ranging from 1 to 7.

Adjust the sensitivity using the dedicated buttons on the device until it accurately responds to your dog's barks without false triggers from other noises.

Smart Anti-Interference Technology

The collar is equipped with smart anti-interference technology that automatically filters out external noises and other dogs' barking, ensuring that the collar only activates in response to your dog's specific barks. This minimizes false triggers and provides more effective training.

Smart Anti-Interference

Automatically Filter other dogs barking and Noise

Dog's Head Shaking

MAINTENANCE AND CARE

To ensure the longevity and proper functioning of your Pewkim Smart Bark Collar, follow these maintenance guidelines:

- **Cleaning:** The collar is IPX7 waterproof, meaning it can withstand splashes and brief immersion. You can wipe the device clean with a damp cloth. Do not use harsh chemicals or abrasive cleaners.

Image: A dog playing in water while wearing the bark collar, demonstrating its IPX7 waterproof rating for activities like swimming, bathing, and rain.

- **Contact Points:** Regularly check the contact points for dirt or debris. Clean them as needed to ensure good contact with your dog's skin.
- **Strap:** Inspect the collar strap for any signs of wear and tear. Replace if damaged.
- **Storage:** When not in use for extended periods, store the collar in a cool, dry place. Ensure it is fully charged before storing to preserve battery health.

TROUBLESHOOTING

If you encounter issues with your bark collar, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Collar not activating when dog barks.	Low battery; Sensitivity too low; Improper fit; Contact points not touching skin.	Charge the collar; Increase sensitivity level; Adjust collar fit; Ensure contact points are making good contact.

Problem	Possible Cause	Solution
Collar activating without dog barking (false triggers).	Sensitivity too high; External noise interference.	Decrease sensitivity level; Ensure the collar is snug and not moving excessively. The smart anti-interference feature should minimize this.
Collar not holding a charge.	Faulty charging cable or adapter; Battery degradation.	Try a different USB charging cable and adapter; If the issue persists, contact customer support.
Dog shows discomfort or irritation.	Collar too tight; Static correction level too high; Prolonged wear.	Loosen the collar slightly; Reduce the static correction level or switch to beep/vibration only; Do not leave the collar on for more than 12 hours a day.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Pewkim
Model Number	B0CHRV75Z9
Item Weight	5.6 ounces
Product Dimensions	3.5 x 1.5 x 0.04 inches (collar unit)
Package Dimensions	3.98 x 3.7 x 1.81 inches
Battery Type	Built-in Rechargeable Battery
Charging Time	Approx. 1.5 hours
Working Time	Up to 20 days (depending on usage)
Waterproof Rating	IPX7
Sensitivity Levels	7 Adjustable Levels
Training Modes	5 (Beep, Vibration, Beep+Vibration, Beep+Vibration+Low Shock, Beep+Vibration+High Shock)
Recommended Dog Weight	8-120 lbs
Collar Length	Adjustable, 9-26 inches
Color	White (collar unit)
Closure Type	Buckle
Date First Available	September 11, 2023
