## Operating Instructions

### Charging Devices

The charging station offers 9 power outputs: 3 AC outlets, 2 USB-C ports, and 4 USB-A ports.

- **USB-C Ports (C1, C2):** These ports support Power Delivery (PD) up to 65W, ideal for fast charging compatible smartphones, tablets, and laptops (e.g., MacBook, iPhone 15/16/17 series).
- **USB-A Ports (A1, A2, A3, A4):** These ports provide standard USB charging for a wide range of devices such as older smartphones, smartwatches, headphones, and other USB-powered accessories.
- **AC Outlets:** The three standard AC outlets (rated 1250W) can power larger electronics like laptops, lamps, or other small appliances.

Simply connect your device's charging cable to the appropriate port on the station. The station will automatically detect and deliver the optimal charging current.

## GaN Technology

This charging station incorporates advanced Gallium Nitride (GaN) technology. GaN allows for smaller, more efficient chargers that generate less heat compared to traditional silicon-based chargers. This results in faster charging speeds and improved device longevity by reducing heat-related wear.
The PD 65W output can charge compatible phones from 0% to 80% in approximately 30 minutes.

## Maintenance

- Disconnect the power cord before cleaning.
- Wipe the device with a soft, dry cloth. Do not use liquid cleaners.
- Store in a cool, dry place when not in use.

## Troubleshooting

### Device not charging:

- Ensure the charging station is properly plugged into a live wall outlet and the indicator light is on.
- Check if the charging cable is securely connected to both the station and your device.
- Try a different port or cable to rule out a faulty connection.
- Verify your device is compatible with the charging port (e.g., USB-C for fast charging).

### Slow charging:

- Ensure your device and cable support fast charging protocols (e.g., PD for USB-C).
- If multiple devices are connected, the total power output is shared. Disconnecting some devices may increase charging speed for others.
- Check the power requirements of your device against the station's output specifications.
