UGREEN UGREEN Nexode 45W USB C Charger, UGREEN 65W Robot GaN USB C Charger

UGREEN Nexode Charger Bundle User Manual

Models: UGREEN Nexode 45W USB C Charger, UGREEN 65W Robot GaN USB C Charger
Brand: UGREEN

Introduction

This manual provides detailed instructions for the safe and efficient use of your UGREEN Nexode 45W USB C Charger and UGREEN 65W Robot GaN USB C Charger. Please read this manual thoroughly before using the product and retain it for future reference.

Safety Information

- Do not expose the chargers to liquids, moisture, or extreme temperatures.
- Do not disassemble, modify, or attempt to repair the chargers. This will void the warranty and may cause damage or injury.
- Use only with compatible devices and cables.
- Ensure proper ventilation when charging to prevent overheating.
- Keep out of reach of children.
- Built-in short circuit protection, overload protection, over temperature protection, and overvoltage protection are designed for safety.

Package Contents

The package includes the following items:

- 1 x UGREEN Nexode 45W USB C Charger
- 1 x UGREEN 65W Robot GaN USB C Charger

Product Overview

UGREEN Nexode 45W USB C Charger

This compact 45W charger features two USB-C ports, allowing for efficient charging of compatible devices. It supports fast charging protocols, including Samsung Super Fast Charging 2.0 (requires a 5A charging cable).

UGREEN 65W Robot GaN USB C Charger

The 65W Robot GaN charger features a unique robot design with an LED display that shows different expressions corresponding to charging states. It includes two USB-C ports and one USB-A port, offering versatile charging for multiple

devices simultaneously.

Setup

1. Unpack the charger(s) from the packaging.
2. Select a suitable power outlet.
3. Plug the charger into the power outlet.
4. Connect your device to the charger using a compatible USB-C or USB-A cable.

Operating Instructions

Single Device Charging

Connect your device to any available USB-C or USB-A port on the charger. The charger will automatically detect the device and deliver the optimal charging power.

Multiple Device Charging

Both the 45W and 65W chargers support simultaneous charging of multiple devices. The chargers feature intelligent power distribution to ensure each connected device receives appropriate power for efficient charging.

Image: The UGREEN 65W Robot GaN USB C Charger connected to both a tablet (receiving 45W) and a smartphone (receiving 20W), demonstrating automatic power distribution.

Image: The UGREEN 65W Robot GaN USB C Charger simultaneously charging a laptop, a smartphone, and wireless earbuds, showcasing its ability to handle multiple devices.

Robot GaN Charger LED Display

The LED display on the 65W Robot GaN charger indicates its operational status:

- **Power On (no device connected):** The LED display shows a specific expression indicating it's ready.
- **While Charging:** The LED display changes to an expression indicating active charging.
- **Full Charged:** The LED display shows an expression indicating the connected device is fully charged.

Maintenance

- Disconnect the charger from the power outlet before cleaning.
- Wipe the surface with a soft, dry cloth. Do not use liquid cleaners or aerosols.
- Store the chargers in a cool, dry place away from direct sunlight and extreme temperatures.

Troubleshooting

Charger Not Working

- Ensure the charger is securely plugged into a working power outlet.
- Check the charging cable for any damage and ensure it is properly connected to both the charger and the device. Try a different cable if available.
- Test the charger with a different device to confirm if the issue is with the charger or the device.

Slow Charging

- Ensure your device supports fast charging and that you are using a compatible fast-charging cable (e.g., a 5A cable for Samsung Super Fast Charging 2.0).
- If multiple devices are connected, the power output per port may be reduced due to intelligent power distribution. Disconnect other devices to test full power to a single device.
- Check if your device is running power-intensive applications in the background.

Overheating

- It is normal for chargers to become warm during operation. However, if the charger becomes excessively hot, disconnect it immediately.
- Ensure adequate ventilation around the charger. Do not cover it or place it in an enclosed space.
- If overheating persists, discontinue use and contact customer support.

Specifications

Feature	Detail
Brand	UGREEN
Model (45W Charger)	UGREEN Nexode 45W USB C Charger
Model (65W Charger)	UGREEN 65W Robot GaN USB C Charger
Connector Type	USB-C, USB-A

Feature	Detail
Compatible Devices	Earbuds, Phones, Tablets, Laptops (e.g., MacBook Pro/Air)
