KXAITO 6256

KXAITO Model 6256 Men's Sports Watch User Manual

This manual provides detailed instructions for the KXAITO Model 6256 multi-function sports watch. Please read carefully before use to ensure proper operation and longevity of your watch.

PRODUCT OVERVIEW

The KXAITO Model 6256 is a robust multi-function sports watch designed for outdoor activities. It features a digital LED display, chronograph (stopwatch), alarm, date display, and luminous hands for visibility in low light conditions. The watch is built to withstand various environments with its water-resistant design.

Image: LED Digital Display. This image demonstrates the watch's clear digital time display, showing its visibility in both daytime and nighttime settings.

INITIAL SETUP

Before using your KXAUTO Model 6256 watch, it is important to set the correct time and date.

Setting Time and Date

1. In normal time display mode, press and hold the **MODE** button (usually bottom-left) until the seconds start flashing. This indicates you are in setting mode.
2. Press the **RESET** button (usually bottom-right) to cycle through the setting options: Seconds → Hour → Minute → Year → Month → Day.
3. Use the **START/PAUSE** button (usually top-right) to adjust the flashing value.
4. Once all settings are correct, press the **MODE** button again to exit setting mode.

12/24 Hour Format

In time setting mode (when the hour is flashing), press the **START/PAUSE** button to toggle between 12-hour (with AM/PM indicator) and 24-hour formats.

Activating Luminous Display

The watch features luminous hands and calibration. For optimal glow in the dark, expose the watch face to a bright light source for a few minutes to allow the phosphors to absorb sufficient light.

OPERATING INSTRUCTIONS

Your KXAITO Model 6256 watch offers several functions accessible via its buttons.

Button Functions Overview

- **LIGHT Button (Top-Left):** Activates the LED backlight for the digital display.
- **MODE Button (Bottom-Left):** Cycles through different modes: Time → Stopwatch → Alarm → Time. Also used to enter/exit setting modes.
- **START/PAUSE Button (Top-Right):** Used to start/stop the stopwatch, adjust values in setting mode, and toggle 12/24H format.
- **RESET Button (Bottom-Right):** Used to reset the stopwatch, select setting items, and activate/deactivate alarm/hourly chime.

Stopwatch Function

1. From Time Mode, press the **MODE** button once to enter Stopwatch Mode. The display will show '00:00:00'.
2. Press the **START/PAUSE** button to start the stopwatch.
3. Press the **START/PAUSE** button again to pause the stopwatch.
4. While paused, press the **RESET** button to reset the stopwatch to '00:00:00'.
5. Press the **MODE** button to return to Time Mode.

Alarm Function

1. From Time Mode, press the **MODE** button twice to enter Alarm Mode. The display will show the alarm time.
2. Press the **RESET** button to toggle the alarm ON/OFF. An alarm icon will appear when activated.
3. To set the alarm time, press and hold the **START/PAUSE** button until the hour flashes.
4. Press the **RESET** button to select Hour or Minute.
5. Use the **START/PAUSE** button to adjust the flashing value.
6. Press the **MODE** button to exit alarm setting mode.

Hourly Chime

In Alarm Mode, press the **START/PAUSE** button and **RESET** button simultaneously to activate or deactivate the hourly chime. An icon will indicate when the hourly chime is active.

LED Backlight

Press the **LIGHT** button (top-left) to illuminate the digital display for a few seconds, allowing you to read the time in dark conditions.

CARE AND MAINTENANCE

Proper care will ensure the longevity and performance of your KXAITO Model 6256 watch.

Water Resistance

Image: 5ATM Water Resistant. This image shows the watch's capability to withstand water splashes and brief immersion.

- The watch is 30M (100FT) water resistant, suitable for daily use, splashes, or brief immersion in water.
- **Do NOT** press any buttons while the watch is submerged in water.
- **Avoid** exposure to hot water, steam, or prolonged immersion, as this can compromise the water resistance seals.
- Not suitable for swimming, diving, or showering with hot water.

Cleaning

Wipe the watch case and strap regularly with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.

Battery Replacement

When the display becomes dim or the watch stops functioning, the battery may need replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure the water resistance seal is maintained.

TROUBLESHOOTING

If you encounter issues with your watch, refer to the following common problems and solutions:

- **Display is dim or blank:** This usually indicates a low battery. Replace the battery.
- **Buttons are unresponsive:** Ensure the watch is not in a locked mode (if applicable, though this model does not specify one). Try pressing the buttons firmly. If the issue persists, the battery might be too low to power the functions, or there could be an internal fault.
- **Time is inaccurate:** Re-set the time following the 'Setting Time and Date' instructions. If the time continues to be inaccurate, the battery may be weak, or the movement may require service.
- **Water inside the watch:** If moisture appears inside the watch, stop using it immediately and take it to a professional for inspection and repair to prevent further damage.

PRODUCT SPECIFICATIONS

Key specifications for the KXAITO Model 6256 watch:

Image: Product Size Parameters. This diagram provides detailed measurements for the watch's length, case diameter,

case thickness, strap width, and overall weight.
