PRODUCT FEATURES

- **Integrated Power Strip:** Equipped with 2 AC outlets (250V/15A) and 2 USB ports (5V/2A) inside the cabinet for convenient charging and powering of bathroom appliances like hair dryers, curling irons, electric toothbrushes, and razors.
- **Removable Hanging Basket & Hair Dryer Holder:** Features a small hanging basket for small items and a dedicated holder for a hair dryer, enhancing organization and ease of use.
- **Thoughtful Design with LED Light Bar:** The top of the mirror cabinet includes an LED light bar, providing illumination for daily skincare and makeup routines. The light bar can rotate 90 degrees for optimal positioning.
- **Mirrored Doors for Privacy and Aesthetics:** Three mirrored doors conceal internal storage, offering both privacy for stored items and a clean, simple aesthetic for your bathroom.
- **Flexible Storage Options:** An open compartment at the bottom provides easy access to frequently used items. Internal shelves are adjustable to three different heights to accommodate various item sizes.

- **High-Quality Hardware:** Equipped with durable hinges for smooth and quiet door operation.

SETUP AND INSTALLATION

This cabinet is designed for wall mounting. Please ensure you have the necessary tools and follow all safety precautions during installation. It is recommended to have two people for assembly and mounting.

Installation Options for Power Strip

The integrated power strip offers two connection methods:

1. **Option 1 (Plug-in):** Connect the cabinet's power cord directly to a standard wall outlet using the provided plug.
2. **Option 2 (Hardwired):** If preferred, the provided plug can be removed, and the cabinet's wires can be directly connected to your wall's electrical wiring. This option should only be performed by a qualified electrician.

OPERATING INSTRUCTIONS

Using the Integrated Power Strip

Once the cabinet is properly installed and connected to power, the internal AC outlets and USB ports are ready for use. Simply plug in your devices as needed. Ensure the total power draw does not exceed the specified limits (250V/15A for AC, 5V/2A for USB).

MAINTENANCE

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that may damage the finish or mirror.
- **Mirror Care:** Use a glass cleaner specifically designed for mirrors. Spray cleaner onto a cloth, not directly onto the

mirror, to prevent liquid from seeping into edges.

- **Electrical Components:** Ensure the power strip is unplugged or the circuit breaker is off before cleaning near electrical components. Do not expose the power strip to excessive moisture.
- **Hinges:** Periodically check hinges for tightness and lubricate if necessary to maintain smooth operation.
- **Weight Capacity:** Do not exceed the maximum weight capacity of 16 kg (35.3 lbs) for the entire cabinet to prevent damage or detachment from the wall.

TROUBLESHOOTING

Problem	Possible Cause	Solution
LED light does not turn on.	No power supply; faulty switch; damaged LED.	Check if the cabinet is properly plugged in or hardwired. Ensure the power strip switch is on. If issues persist, contact customer support.
Power outlets/USB ports not working.	No power supply; power strip switch off; overloaded circuit.	Verify power connection. Ensure the power strip switch is on. Unplug some devices to check for overload.
Cabinet doors are misaligned or squeaky.	Loose hinges; uneven installation.	Tighten hinge screws. Adjust hinges if they are adjustable. Lubricate hinges with a suitable lubricant.
Cabinet feels unstable on the wall.	Improper installation; insufficient wall anchors.	Re-check installation steps. Ensure appropriate wall anchors are used for your wall type. Do not exceed weight capacity. If unsure, consult a professional.
