Safety Information

For your safety and to ensure proper operation, please adhere to the following guidelines:

- Avoid touching the blades directly to prevent injury.
- Refer to the complete product manual for specific safety instructions, including details on water resistance capabilities.
- Keep the device out of reach of children.
- Do not use the device if it is damaged or malfunctioning.

- Ensure the charging cable and adapter are in good condition before use.

Package Contents

The Bell+Howell Vacutrim package includes the following components:

- Bell+Howell Vacutrim Cordless Body Shaver
- Charging cable (USB)
- Home adapter for electrical socket charging
- Cleaning brush
- Lubricating oil
- 2 comb attachments
- User manual (this document)

Image: All components included with the Bell+Howell Vacutrim: the shaver, two comb attachments, a cleaning brush, blade oil, and a USB charging cable.

Setup

Charging the Device

Before initial use, fully charge the Bell+Howell Vacutrim. The device can be charged using the provided USB cable and home adapter.

1. Connect the USB charging cable to the Vacutrim.
2. Plug the USB cable into the home adapter, then into an electrical socket, or directly into any compatible USB port (e.g., laptop).
3. The initial charge time is approximately 2.5 hours (150 minutes).
4. A full charge provides approximately 90 minutes of run time.
5. The Vacutrim can be used while it is plugged in and charging.

Operating Instructions

Selecting Trim Length

The Vacutrim features a calibration dial with 20 trim length settings, eliminating the need for multiple comb attachments. Simply turn the dial to select your desired length.

Image: A close-up view of the Vacutrim's calibration dial, which allows for easy adjustment of the trim length without changing comb attachments.

Trimming Procedure

Follow these steps for effective grooming:

1. Ensure the device is fully charged or plugged in.
2. Select the desired trim length using the calibration dial.
3. Turn on the device.
4. Trim in an upward and downward motion, moving against the direction of hair growth for best results.
5. The integrated vacuum system will collect hair clippings during use.

Maintenance

Emptying Hair Clippings

The built-in vacuum system collects hair clippings in an internal chamber. Empty this chamber after each use or as needed to maintain optimal performance.

- To access the compartment, push up on the top section of the shaver.
- Discard the accumulated hair clippings.
- Close the compartment securely after emptying.

Cleaning and Lubrication

Regular cleaning and lubrication ensure the longevity and performance of your Vacutrim.

- Use the provided cleaning brush to remove any remaining hair from the blades and internal components.
- Apply a few drops of the lubricating oil to the blades after cleaning to maintain smooth operation.
- The ceramic blade is washable; rinse with water for easy cleanup. Ensure the device is off and unplugged before rinsing.

Troubleshooting

If you encounter issues with your Bell+Howell Vacutrim, refer to the following common solutions:

Problem	Possible Cause	Solution
Device does not turn on or charge.	Battery is depleted; charging cable or adapter is faulty; device malfunction.	Ensure the device is fully charged (2.5 hours for initial charge). Check if the charging cable and adapter are securely connected and functional. Try charging from a different USB port or outlet. If the issue persists, contact customer support.

Problem	Possible Cause	Solution
Poor trimming performance or pulling hair.	Blades are dull or clogged with hair; insufficient lubrication.	Clean the blades thoroughly with the provided brush. Apply lubricating oil to the blades. Ensure the hair collection chamber is not full.
Vacuum system not collecting hair effectively.	Hair collection chamber is full; vacuum intake is blocked.	Empty the hair collection chamber. Check for any blockages in the vacuum intake area and clear them.
