## MAINTENANCE

### 1. Cleaning the Device

### 2. Battery Care

To prolong battery life, avoid exposing your phone to extreme temperatures. While the 120W HyperCharge is efficient, occasional slower charging can also benefit battery health. Avoid completely draining the battery frequently. The device features a 5000 mAh battery with an average life of 48 hours under typical usage.

### 3. Software Updates

Regularly check for and install software updates to ensure your device has the latest features, security patches, and performance improvements. Go to **Settings > About phone > MIUI version** to check for updates.

### 4. Water Resistance

The Xiaomi 13T Pro is rated as waterproof. However, water resistance is not a permanent condition and may decrease over time with normal wear. Avoid submerging the device in water or exposing it to high-pressure water jets. Damage caused by liquids is not covered under warranty.

## TROUBLESHOOTING

---

### Device Not Powering On

If your device does not power on, ensure it is sufficiently charged. Connect it to the charger and wait a few minutes before attempting to power it on again. If the issue persists, try holding the Power button for an extended period (10-15 seconds).

### Charging Issues

If the phone is not charging, check the charging cable and adapter for damage. Ensure the USB Type-C port on the phone is clean and free of debris. Try using a different compatible charger and cable.

### Network Connectivity Problems

If you experience issues with mobile data or calls, verify that your SIM card is properly inserted and active. Check your network settings in **Settings > SIM cards & mobile networks**. Try restarting the device or toggling Airplane Mode on and off.

### Performance Slowdown

If your phone is running slowly, try clearing recent apps, restarting the device, or clearing the cache of frequently used applications. Ensure you have sufficient storage space available. Consider performing a factory reset as a last resort (**Settings > About phone > Factory reset**), but back up all data first as this will erase all content.
