MIRADOR Shutter Wall 10' Side

MIRADOR Aluminum Fixed Shutter Wall (10' Side, 111 Series, Charcoal) Instruction Manual

Model: Shutter Wall 10' Side | Brand: MIRADOR

1. INTRODUCTION

This manual provides essential information for the safe and effective installation, operation, and maintenance of your MIRADOR Aluminum Fixed Shutter Wall. Designed for the 111 Series pergolas, this shutter wall offers enhanced privacy and controlled sunlight for your outdoor living space. Please read these instructions thoroughly before beginning assembly or use.

2. SAFETY INFORMATION

Always follow the manufacturer's instructions for assembly, installation, and maintenance. Keep the area around the shutter wall clean and free of debris to prevent accidents. Do not use the shutter wall in extreme weather conditions or when the ground is unstable. Always ensure the shutter wall is securely anchored to a stable foundation. Be cautious when handling the components, as they may be heavy and pose a risk of injury if not handled properly.

3. COMPONENTS OVERVIEW

The MIRADOR Aluminum Fixed Shutter Wall consists of aluminum louver panels, side frames, and necessary hardware for assembly. Refer to your product packaging for a complete and detailed list of all included parts and fasteners.

4. SETUP AND ASSEMBLY

The Mirador Aluminum Fixed Shutter Wall is designed for straightforward installation, providing a seamless fit with Mirador 111S and 111DA pergola systems. While assembly is generally considered easy, careful attention to detail is required to

ensure all louver panels are securely in place.

4.1. Assembly Process

1. Begin by attaching the two main end panels to the base structure of your pergola.
2. Secure the first louver panel at the top and the last louver panel at the very bottom of the side frames.
3. Next, attach the middle piece that connects the louver panels. This creates a stable framework for the remaining louvers.
4. For each subsequent louver panel, carefully slide one end into its designated slot on one side frame. Simultaneously, lift the panel slightly and slide the other end into the corresponding slot on the opposite side frame.
5. It is crucial to hold each panel in place as you proceed to the next. Once a few panels are in place, gently tighten the screws on the first attached pieces to reduce slack and prevent panels from falling out.
6. Continue this process, working from one end to the other, ensuring each louver is properly seated and held before moving on.
7. Once all louver panels are in place, fully tighten all screws to secure the entire shutter wall.

5. OPERATING INSTRUCTIONS

The Mirador Fixed Shutter Wall features an elegant louvered design that provides optimal privacy and sunlight control. While the louvers are fixed, their angled design allows for a balance of airflow and light filtration, enhancing your outdoor comfort.

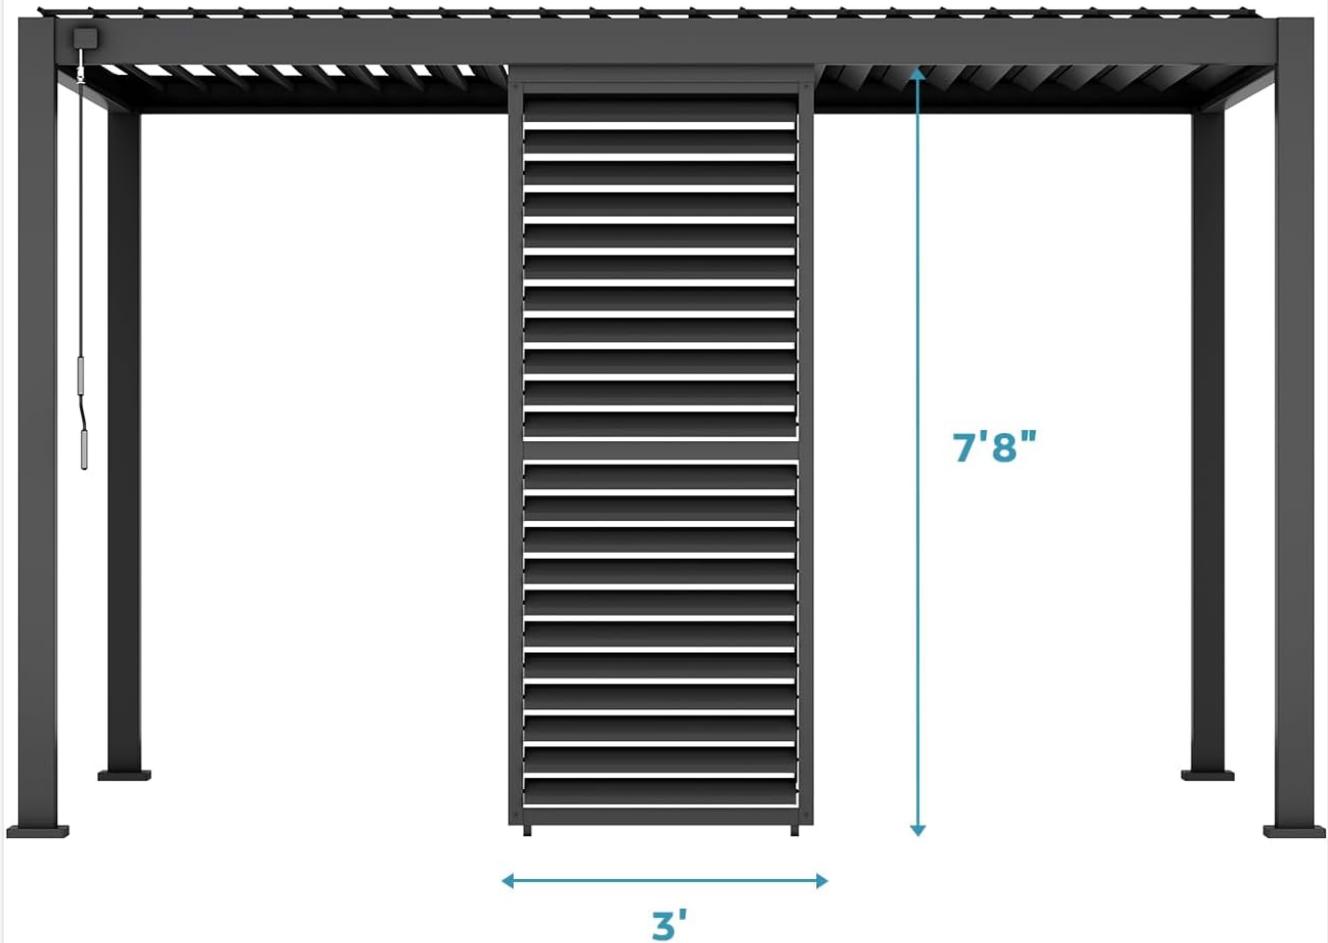

5.1. Privacy and Sunlight Control

The louvered structure is designed to block direct views and harsh sunlight, creating a more private and shaded environment. The fixed angle of the louvers is optimized to allow for air circulation while still offering significant protection from solar glare.

6. MAINTENANCE

The Mirador Aluminum Fixed Shutter Wall is crafted from high-quality aluminum, ensuring durability and resistance to corrosion. To maintain its appearance and functionality, follow these simple guidelines:

- **Cleaning:** Regularly clean the shutter wall with a soft cloth, mild soap, and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Debris Removal:** Keep the louvers and frame free of leaves, dirt, and other debris to ensure proper airflow and prevent accumulation that could lead to staining or damage.
- **Inspection:** Periodically inspect all screws and connections to ensure they remain tight. Re-tighten any loose fasteners as needed.

- **Weather Protection:** While durable, consider additional protection or temporary removal in extreme weather conditions (e.g., heavy storms, high winds) if recommended by the pergola manufacturer.

7. TROUBLESHOOTING

If you encounter any issues with your Mirador Aluminum Fixed Shutter Wall, please refer to the following common solutions:

- **Loose Panels:** If louver panels feel loose or fall out during assembly, ensure all side frames and connecting pieces are securely fastened. Re-tighten screws as necessary.
- **Difficulty in Assembly:** If you find it challenging to slide panels into place, double-check that the side frames are correctly aligned and that you are inserting the panels at the correct angle. Ensure no debris is obstructing the channels.
- **Scratches/Dents:** Minor scratches can sometimes be touched up with appropriate outdoor-grade paint matching the charcoal finish. For significant damage, contact customer support.

8. SPECIFICATIONS

Feature	Detail
Brand	MIRADOR
Model Number	Shutter Wall 10' Side
Material	Aluminum
Color	Charcoal
Style	Modern
Product Dimensions	94"L x 37"W x 2"H
Item Weight	35 Pounds
Frame Material	Aluminum
Water Resistance Level	Not Water Resistant
Shape	Rectangular
Ultraviolet Light Protection	Yes
Assembly Required	Yes

9. WARRANTY INFORMATION

Specific warranty details for the Mirador Aluminum Fixed Shutter Wall are not provided in the product information. For comprehensive warranty coverage and terms, please refer to the documentation included with your purchase or contact MIRADOR customer support directly.

10. CUSTOMER SUPPORT
