Dreo DR-HPA017

Dreo Demineralization Cartridge Instruction Manual

Models: HM512S, HM713, HM713S, HM717S

INTRODUCTION

This manual provides essential information for the proper use and maintenance of your Dreo Demineralization Cartridge. Designed to enhance the performance of compatible Dreo humidifiers, these cartridges effectively reduce mineral buildup and white dust, contributing to healthier humidification and easier appliance maintenance.

PRODUCT OVERVIEW

The Dreo Demineralization Cartridge features an advanced three-layer ion exchange resin filtration system. This system is engineered to purify water by targeting and removing calcium and magnesium ions, which are primary contributors to hard water and white dust formation.

- **Outer Layer:** Traps larger impurities.
- **Ion Exchange Resin:** Actively removes calcium and magnesium ions.
- **Bottom Layer:** Filters additional impurities before mist release.

Compatible with Dreo Humidifiers

By reducing mineral content, the cartridge helps prevent the accumulation of white dust on surfaces around your humidifier and slows down limescale buildup within the humidifier's components, thereby extending its lifespan and maintaining optimal humidification efficiency.

Ion-exchange Demineralization Tech

COMPATIBILITY

The Dreo Demineralization Cartridge is specifically designed for use with the following Dreo Humidifier models:

- Dreo HM512S
- Dreo HM713
- Dreo HM713S
- Dreo HM717S

Using this cartridge with non-compatible models may result in suboptimal performance or damage to the humidifier.

SETUP & INSTALLATION

Follow these steps to properly install the demineralization cartridge into your Dreo humidifier:

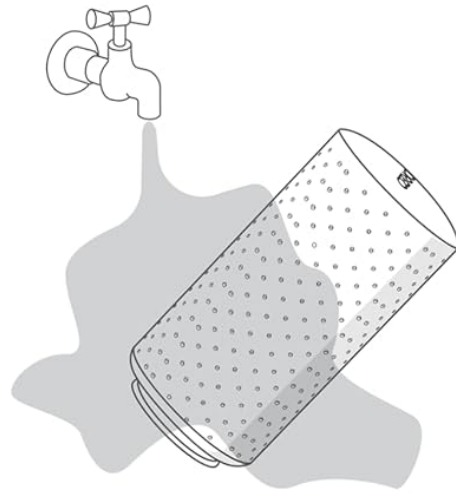

1. **Unbox and Prepare:** Carefully unbox the demineralization cartridge. Remove any protective wraps or packaging materials (if included).
2. **Rinse with Water:** Rinse the cartridge thoroughly under cool tap water for approximately 1-2 minutes. This helps activate the resin and remove any loose particles.
3. **Attach to Water Tank:** Locate the designated slot or attachment point for the cartridge within your humidifier's water tank. Gently press the cartridge into place until it is securely seated. Refer to your specific humidifier's manual for exact placement if unsure.
4. **Fill Water Tank:** Fill the humidifier's water tank with clean, room-temperature water. *Do not fill with hot water.*

How To Use

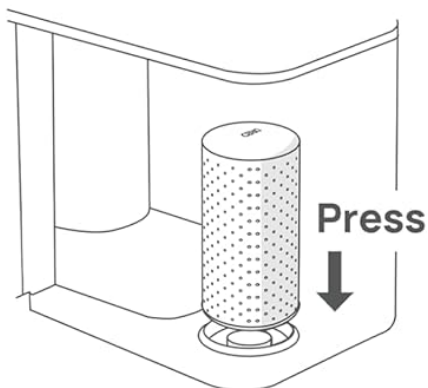

1

Unbox the demineralization cartridge and remove all the wraps (if included)

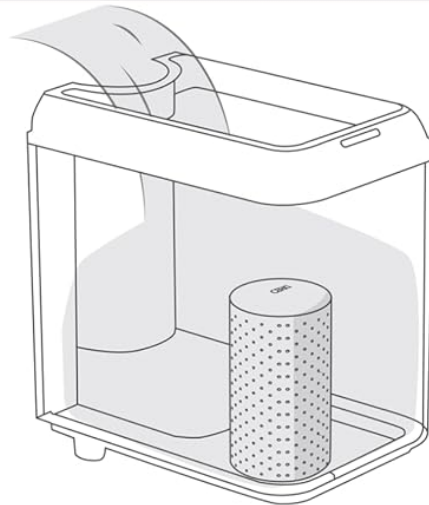

2

Rinse it with water

3

Attach the demineralization cartridge to the water tank

4

Fill the tank with room-temperature water

* DO not fill with hot water.

OPERATION

Once installed, the demineralization cartridge operates passively as water passes through it during humidification. It continuously filters minerals from the water, reducing the likelihood of white dust and scale formation.

For compatible smart Dreo humidifiers, you can monitor the cartridge's life and receive smart cleaning reminders directly through the Dreo app. This feature helps you track usage and ensures timely replacement for optimal performance.

MAINTENANCE & REPLACEMENT

The lifespan of a demineralization cartridge depends on water hardness and usage frequency. A single cartridge can purify up to 40 gallons of water, typically lasting about one month with regular use. The Dreo app will provide smart reminders when it's time to replace the cartridge.

Replacement Procedure:

1. Turn off and unplug your humidifier.
2. Remove the water tank from the humidifier base.
3. Carefully remove the old demineralization cartridge from its slot. Dispose of the used cartridge responsibly.
4. Follow the 'Setup & Installation' steps above to install a new cartridge.
5. Refill the water tank and reassemble the humidifier.
6. If using the Dreo app, reset the filter life counter after replacement.

TROUBLESHOOTING

Issue: White Dust Still Appears

- **Check Installation:** Ensure the cartridge is correctly and securely installed in the water tank.
- **Water Hardness:** In areas with extremely hard water, some white dust may still occur, though significantly reduced. Consider using distilled or demineralized water for best results.
- **Cartridge Life:** The cartridge may have reached the end of its effective life. Replace it with a new one.

Issue: Unusual Odor from Humidifier

- **Initial Rinse:** Ensure the new cartridge was thoroughly rinsed before first use. Some new filter materials may have a faint initial scent that dissipates after rinsing and a few hours of operation.
- **Humidifier Cleanliness:** A dirty humidifier tank or base can cause odors. Clean your humidifier regularly according to its instruction manual.
- **Water Quality:** Use fresh, clean water. Do not leave stagnant water in the tank for extended periods.
- **Cartridge Condition:** If the odor persists and is attributed to the cartridge, replace it.

SPECIFICATIONS

Feature	Detail
Brand	Dreo
Special Feature	Ion-exchange Demineralization Tech
Product Dimensions	2.36"D x 2.36"W x 5"H
Item Weight	1.6 Pounds (for 3-pack)
Model Name	DR-HPA017
UPC	850049246125
Number of Pieces	3 (in a pack)

WARRANTY AND SUPPORT

For warranty information, technical support, or any questions regarding your Dreo Demineralization Cartridge, please refer to the warranty card included with your purchase or visit the official Dreo website. You can also contact Dreo customer service directly for assistance.
