SETUP

Package Contents

- AJAZZ AK820PRO Gaming Keyboard
- USB Type-C Cable
- 2.4GHz USB Receiver

Connecting Your Keyboard

The AK820PRO offers three connection methods: wired, 2.4GHz wireless, and Bluetooth.

Wired Connection

1. Locate the USB Type-C port on the keyboard.
2. Connect one end of the provided USB Type-C cable to the keyboard.
3. Connect the other end of the cable to an available USB port on your computer.
4. The keyboard will be automatically recognized and ready for use.

2.4GHz Wireless Connection

1. Locate the 2.4GHz USB receiver, typically stored in a compartment on the underside of the keyboard.
2. Plug the 2.4GHz USB receiver into an available USB port on your computer.
3. On the underside of the keyboard, switch the connection mode toggle to '2.4G'.
4. The keyboard will automatically connect to the receiver. The TFT screen may display the connection status.

Bluetooth Connection

1. On the underside of the keyboard, switch the connection mode toggle to 'BT'.
2. The keyboard will enter pairing mode. The TFT screen may indicate Bluetooth pairing.
3. On your computer or device, open Bluetooth settings and search for new devices.
4. Select 'AJAZZ AK820PRO' from the list of available devices to pair.
5. Once paired, the keyboard is ready for use. The keyboard supports connecting to up to three Bluetooth devices.

OPERATING INSTRUCTIONS

Volume Knob Functions

The multi-functional knob located on the top right of the keyboard controls various settings:

- **Rotate:** Adjusts system volume (default).
- **Press:** Mutes/unmutes audio (default).
- **Press and Hold (3 seconds):** Enters the knob function menu on the TFT screen. From this menu, you can navigate options such as LED effects, colors, battery status, time & date, and language switching.

RGB Backlighting

The keyboard features programmable RGB backlighting with various effects:

- Cycle Effects:** Use **Fn + \|** to switch between 20 different backlight effects.
- Adjust Colors:** Use **Fn + Left/Right Arrow keys** to cycle through colors.
- Adjust Brightness:** Use **Fn + Up/Down Arrow keys** to adjust brightness.
- Software Customization:** For advanced control and custom lighting profiles, use the AJAZZ driver software.

Programmable RGB Backlit

Hot-Swappable Switches

The AK820PRO supports hot-swappable switches, allowing you to change mechanical switches without soldering. It is compatible with 3-pin and 5-pin switches.

- Removing Switches:** Use the included switch puller tool to gently pull the switch upwards from the keyboard plate.
- Installing Switches:** Align the pins of the new switch with the holes on the PCB and press down gently until it clicks into place. Ensure pins are straight to avoid bending.

Hot Swap Gasket Keyboard

- ① 1.2mm single key slotted PCB
- ② Hot-swappable & south-facing RGB LEDs
- ③ PORON sandwich cotton, bottom cotton and IXPE shaft underpad

Image: The keyboard highlighting its hot-swappable feature, showing a switch being removed and the underlying PCB with south-facing RGB LEDs.

Key Functions and Shortcuts

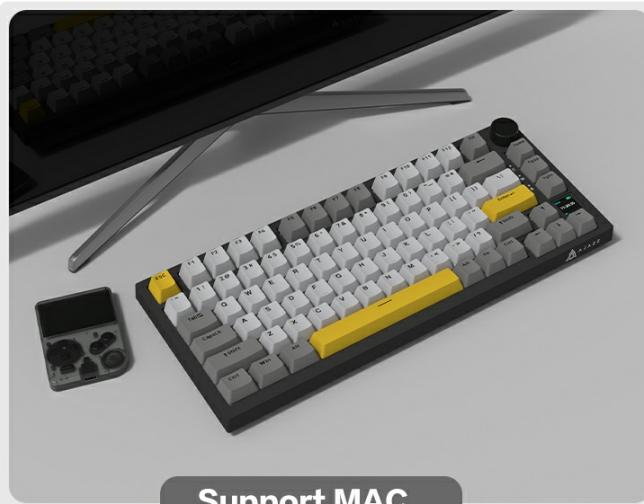

The keyboard includes various function key shortcuts:

- **Fn + Win:** Locks/unlocks the Windows key.
- **Fn + F10:** Mute audio.
- **Fn + F11:** Volume down.
- **Fn + F12:** Volume up.
- **Fn + Spacebar (hold 3 seconds):** Resets keyboard to factory default settings.
- **Fn + PgUp:** Print Screen.

Software Installation and Use

For full customization of RGB lighting, TFT screen, and macro programming, download the official AJAZZ driver software from the AJAZZ website. Ensure you download the correct version for your operating system

(Windows/Mac).

MAINTENANCE

- Cleaning Keycaps:** Use a soft, damp cloth to wipe down keycaps. For deeper cleaning, remove keycaps using the included keycap puller and wash them with mild soap and water. Ensure they are completely dry before reattaching.
- Cleaning the Keyboard Body:** Use a dry, soft cloth to wipe the keyboard body. Avoid using harsh chemicals or abrasive materials.

- **Dust Removal:** Use compressed air to remove dust and debris from between the keycaps and under the switches.
- **Battery Care:** To prolong battery life, avoid fully discharging the keyboard frequently. Store in a cool, dry place when not in use for extended periods.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Keyboard not responding (wired)	Loose cable connection, faulty USB port, driver issue.	Ensure USB-C cable is securely connected. Try a different USB port or cable. Restart your computer.
Keyboard not connecting (wireless)	Incorrect mode selected, low battery, pairing issue, receiver not plugged in.	Check the mode switch (2.4G/BT). Charge the keyboard. Re-pair Bluetooth or re-insert 2.4GHz receiver. Ensure receiver is fully inserted.
RGB lighting not working or stuck	Software conflict, incorrect settings.	Use Fn + \ to cycle effects. Adjust brightness with Fn + Up/Down. Check software settings. Perform a factory reset (Fn + Spacebar for 3 seconds).
TFT screen not displaying correctly	Software issue, custom GIF/image problem.	Ensure the keyboard is connected to the software. Try resetting the keyboard. Re-upload custom content if applicable.
Software is partially in Chinese	Language setting issue within the software.	Check the language settings within the AJAZZ driver software. If the option is available, select English. If not, ensure you downloaded the English version of the software from the official website.
Indicator lights are too bright	Design characteristic.	This is a known characteristic. There is no direct software control to dim these specific indicator lights.

SPECIFICATIONS

Feature	Detail
