- **Spills:** Immediately wipe up any spills to prevent staining or water damage to the MDF board.
- **Sunlight:** Avoid prolonged exposure to direct sunlight to prevent fading or discoloration of the wood finish and rattan.
- **Humidity:** Maintain a stable humidity level in the room to prevent warping or cracking of the wood.
- **Inspection:** Periodically check all fasteners and connections to ensure they remain tight. Tighten if necessary.

## 8. TROUBLESHOOTING

If you encounter issues with door alignment, the following adjustments can be made using the hinge screws:

Figure 4: Hinge adjustment points for door alignment.

- **Adjusting Door Height (Up/Down):** Locate screw 'A' on the hinge. Loosen this screw slightly, adjust the door to the desired vertical position, then re-tighten screw 'A'.
- **Adjusting Door Depth (In/Out):** Locate screw 'B' on the hinge. Loosen this screw, push or pull the door to achieve the correct depth (flush with the cabinet frame), then re-tighten screw 'B'.
- **Adjusting Gap Between Doors (Left/Right):** Locate screw 'C' on the hinge. Loosen this screw,

move the door horizontally to achieve an even gap between adjacent doors, then re-tighten screw 'C'.

Make small adjustments and check the alignment after each step until the doors are perfectly aligned.
