DotMod Switch R Pod User Manual

Model: 56176

INTRODUCTION

Thank you for choosing the DotMod Switch R Pods. These high-quality replacement tanks are designed to perfectly complement your DotMod Switch R Stick, providing an optimal performance and a premium vaping experience. With an integrated atomizer head and a generous 3ml filling volume, you can enjoy your favorite e-liquids for extended periods without frequent refills. DotMod Switch R Pods are easy to install and deliver reliable, flavor-intensive vapor production.

IMPORTANT SAFETY INFORMATION

Disclaimer: This product is nicotine-free and does not contain any liquids. Keep out of reach of children and pets. Store in a cool, dry place away from direct sunlight.

PRODUCT OVERVIEW

The DotMod Switch R Pods are designed for ease of use and optimal performance. Each pod features a pre-installed coil and a side-fill system for convenient refilling.

Image: Two DotMod Switch R Pods. This image displays two pods side-by-side, highlighting their transparent body, the "dot." logo, the 0.8 Ohm resistance marking, and the red "OPEN" tab for the side-fill port. The CE and recycling symbols are also visible at the bottom.

Image: Single DotMod Switch R Pod. This image provides a closer look at a single pod, emphasizing the red "OPEN" tab for the side-fill mechanism and the clear indication of the 0.8 Ohm resistance.

Image: Side view of DotMod Switch R Pod. This image shows the pod from a slightly different angle, highlighting the shape of the mouthpiece and the location of the side-fill port.

SETUP

Filling the Pod

1. Remove the pod from your DotMod Switch R Stick.
2. Locate the red "OPEN" tab on the side of the pod. Gently lift or slide this tab to reveal the filling port.
3. Insert the nozzle of your e-liquid bottle into the filling port.
4. Carefully fill the pod with up to 3ml of your preferred e-liquid. Avoid overfilling.
5. Close the red tab securely to prevent leaks.
6. After filling a new pod, wait at least 5-10 minutes before vaping to allow the coil to become fully saturated with e-liquid. This is known as "priming" the coil and helps prevent dry hits and extends coil life.

Installing the Pod

- Ensure the pod is properly filled and the fill port is closed.
- Align the bottom of the pod with the pod slot on your DotMod Switch R Stick.

- The pod will snap into place magnetically. Ensure it is seated firmly.

OPERATING

Once the pod is filled and installed, your DotMod Switch R Stick is ready for use. The device typically operates via an auto-draw mechanism or a fire button, depending on your specific DotMod Switch R model.

- **Vaping:** Inhale through the mouthpiece to activate the device (auto-draw) or press and hold the fire button while inhaling.
- **Monitoring E-liquid Level:** The transparent design of the pod allows you to easily monitor your e-liquid level. Refill the pod before it runs completely dry to prevent coil damage.

MAINTENANCE

Pod Replacement

The DotMod Switch R Pods feature a fixed, non-replaceable coil. When you notice a decrease in flavor, vapor production, or a burnt taste, it's time to replace the entire pod.

1. Remove the old pod from your DotMod Switch R Stick.
2. Dispose of the old pod responsibly according to local regulations.
3. Install a new, pre-filled or freshly filled pod as described in the "Setup" section.

Cleaning

- Periodically clean the contact points on both the pod and your DotMod Switch R Stick with a dry cotton swab or tissue to ensure good connectivity.
- Wipe down the exterior of the pod with a clean, damp cloth if necessary. Do not submerge the pod in water.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No vapor or weak vapor	Low e-liquid level; Poor connection; Coil burnt out; Device battery low.	Refill pod; Clean contact points; Replace pod; Charge device battery.
Burnt taste	Coil not primed; E-liquid level too low; Coil burnt out.	Ensure proper priming (wait 5-10 min after filling); Refill pod; Replace pod.
Leaking	Overfilling; Fill port not closed properly; Damaged pod.	Do not overfill; Ensure fill tab is securely closed; Replace pod if damaged.
