3.2 Ports and Connectors

The device includes various ports for power, video output, and peripheral connections:

- **DC IN:** Power input port.
- **LAN:** Ethernet port for wired network connection.
- **HD:** HDMI output for connecting to your TV or monitor.
- **USB Ports:** Multiple USB ports for connecting external storage devices or other peripherals.
- **TF Card Slot:** For expandable storage via a TF (MicroSD) card.

4. SETUP INSTRUCTIONS

Follow these steps to connect your BOXPUT Q8 TV Box to your television and power source:

- 1. Connect HDMI Cable:** Insert one end of the HD cable into the HDMI port on the TV Box and the other end into an available HDMI port on your TV.
- 2. Connect Power Adapter:** Plug the power adapter into the DC IN port on the TV Box, then plug the adapter into a wall outlet.
- 3. Connect to Network (Optional):** For a wired connection, connect an Ethernet cable from your router to the LAN port on the TV Box. For Wi-Fi, you will configure it during the initial setup.
- 4. Power On:** The TV Box should power on automatically. If not, press the power button on the device or remote control.
- 5. Select Input:** On your TV, select the correct HDMI input source using your TV's remote control.
- 6. Pair Remote Control:** Follow the on-screen instructions to pair the Bluetooth remote control. Typically, this involves holding down specific buttons on the remote close to the device until pairing is complete.
- 7. Initial Setup:** Follow the on-screen wizard to complete the initial setup, including language selection, Wi-Fi connection, and Google account login.

5. OPERATING INSTRUCTIONS

The BOXPUT Q8 TV Box runs on Android 11.0, providing a user-friendly interface for accessing various applications and media content.

5.1 Android 11.0 OS

The upgraded Android 11.0 operating system ensures faster and smoother performance, offering a better viewing experience compared to previous versions. Application installation is more flexible, and the system provides an optimized layout for TV screens.

Image: A visual comparison highlighting the improved application installation flexibility and performance of Android 11.0 compared to older Android versions.

5.2 Remote Control Functions

The included IR Isolation BT Voice Remote Control offers convenient navigation and voice commands. It also features an IR learning function, allowing it to learn functions from your original IR remote control, consolidating your remote needs.

- **Voice Control:** Press the voice button to use voice commands for searching content or controlling the device.
- **Navigation:** Use the directional pad and OK button to navigate menus and select items.
- **Quick Access Buttons:** Dedicated buttons for popular streaming services like YouTube, Netflix, and Disney+ for instant access.
- **IR Learning:** Program the remote to control basic TV functions (e.g., power, volume) using its IR learning capability.

5.3 Media Playback and Streaming

The Q8 TV Box provides a one-stop media playback solution with a built-in player that supports various content types and includes a recording function. Enjoy 4K HDR visuals for a more immersive experience.

- **4K HDR:** Experience stunning visuals with 4K resolution and High Dynamic Range (HDR) for brighter colors and greater detail.
- **Wireless Screen Mirroring:** Utilize DLNA, Airplay, or Miracast to stream content from your phone, tablet, or laptop to your TV.
- **TV Version Apps:** The system offers a TV-optimized layout, allowing easy navigation and video switching using the remote control buttons.

6. MAINTENANCE

To ensure optimal performance and longevity of your BOXPUT Q8 TV Box, consider the following maintenance tips:

- **Keep Clean:** Regularly wipe the device with a soft, dry cloth to remove dust. Avoid using liquid cleaners.
- **Ventilation:** Ensure the TV Box is placed in a well-ventilated area to prevent overheating. Do not cover

ventilation openings.

- **Software Updates:** Periodically check for and install system updates to benefit from performance improvements and new features.
- **Power Cycle:** If the device becomes unresponsive, disconnect the power adapter for a few seconds and then reconnect it.

7. TROUBLESHOOTING

If you encounter issues with your BOXPUT Q8 TV Box, refer to the following common solutions. If the problem persists, please contact BOXPUT Official Support.

- **No Power:** Ensure the power adapter is securely connected to the device and a working power outlet.
- **No Picture:** Verify the HDMI cable is correctly connected to both the TV Box and your TV. Ensure your TV is set to the correct HDMI input source.
- **Remote Not Responding:** Check the batteries in the remote control. If it's a Bluetooth remote, try re-pairing it according to the setup instructions.
- **Buffering/Slow Performance:** Check your internet connection speed. For Wi-Fi, try moving the device closer to your router or using a wired Ethernet connection. Close unused applications to free up RAM.
- **App Issues:** If an app is not working correctly, try clearing its cache or reinstalling it from the Google Play Store.

For further assistance, please contact BOXPUT Official Support and provide your device's MAC address. Our technical team will assist you within 24 hours.
