NOIROT Floba 500W

NOIROT Floba Liquid Programmable Towel Radiator - 500 Watt User Manual

Model: Floba 500W

1. Introduction

Thank you for choosing the NOIROT Floba Liquid Programmable Towel Radiator. This manual provides essential information for the safe installation, operation, and maintenance of your new appliance. Please read these instructions carefully before use and retain them for future reference.

2. Safety Information

Important: Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

- Ensure the appliance is installed by a qualified electrician in accordance with local wiring regulations.
- Do not operate the radiator with a damaged cord or plug.
- Keep the power cord away from heated surfaces.
- Do not immerse the radiator in water or other liquids.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Do not cover the radiator, as this may cause overheating.
- Ensure the radiator is securely mounted to the wall before use.

3. Package Contents

Please check that all components are present and undamaged:

- NOIROT Floba Towel Radiator (500W)
- Wall mounting brackets (4 units)
- Fixing screws and wall plugs
- Instruction Manual

4. Setup and Installation

The NOIROT Floba Towel Radiator is designed for wall-mounted installation. Proper installation is crucial for safety and optimal performance.

4.1 Wall Mounting

The radiator features a round tube design with four fixing brackets for secure wall mounting and ample space for towels.

Image 1: NOIROT Floba Towel Radiator installed in a modern bathroom, showcasing its wall-mounted design and capacity.

1. Choose a suitable location in your bathroom, ensuring sufficient clearance from water sources and flammable materials.
2. Mark the drilling points for the four wall mounting brackets using the provided template (if applicable) or by carefully measuring.
3. Drill holes and insert wall plugs suitable for your wall type.
4. Securely attach the mounting brackets to the wall.
5. Carefully position the radiator onto the brackets and secure it in place according to the specific bracket design.

4.2 Electrical Connection

This appliance must be connected to a grounded electrical outlet. Consult a qualified electrician for proper wiring and connection to your household electrical system.

- Ensure the power supply matches the voltage specified on the product label (230V AC).
- The radiator is designed for permanent wall mounting and typically requires a direct electrical connection rather than a plug-in.

5. Operating Instructions

The NOIROT Floba Towel Radiator features an intuitive control panel for easy operation.

Image 2: Detailed view of the energy-saving control panel.

5.1 Power On/Off

Press the power button ( ) on the control panel to turn the radiator on or off.

5.2 Temperature Adjustment

Use the '+' and '-' buttons to set your desired temperature. The current temperature setting will be displayed on the digital screen.

5.3 Mode Selection

Press the 'MODE' button to cycle through available operating modes, such as Comfort, Eco, or Frost Protection. Refer to the display for the active mode.

5.4 Boost Function

Activate the 'BOOST' function for a temporary period of maximum heating, ideal for quickly warming towels or the

bathroom. Press the 'BOOST' button to engage; the duration is typically pre-set or adjustable in settings.

6. Programming Features

The Floba radiator includes advanced programming options to optimize energy consumption and comfort.

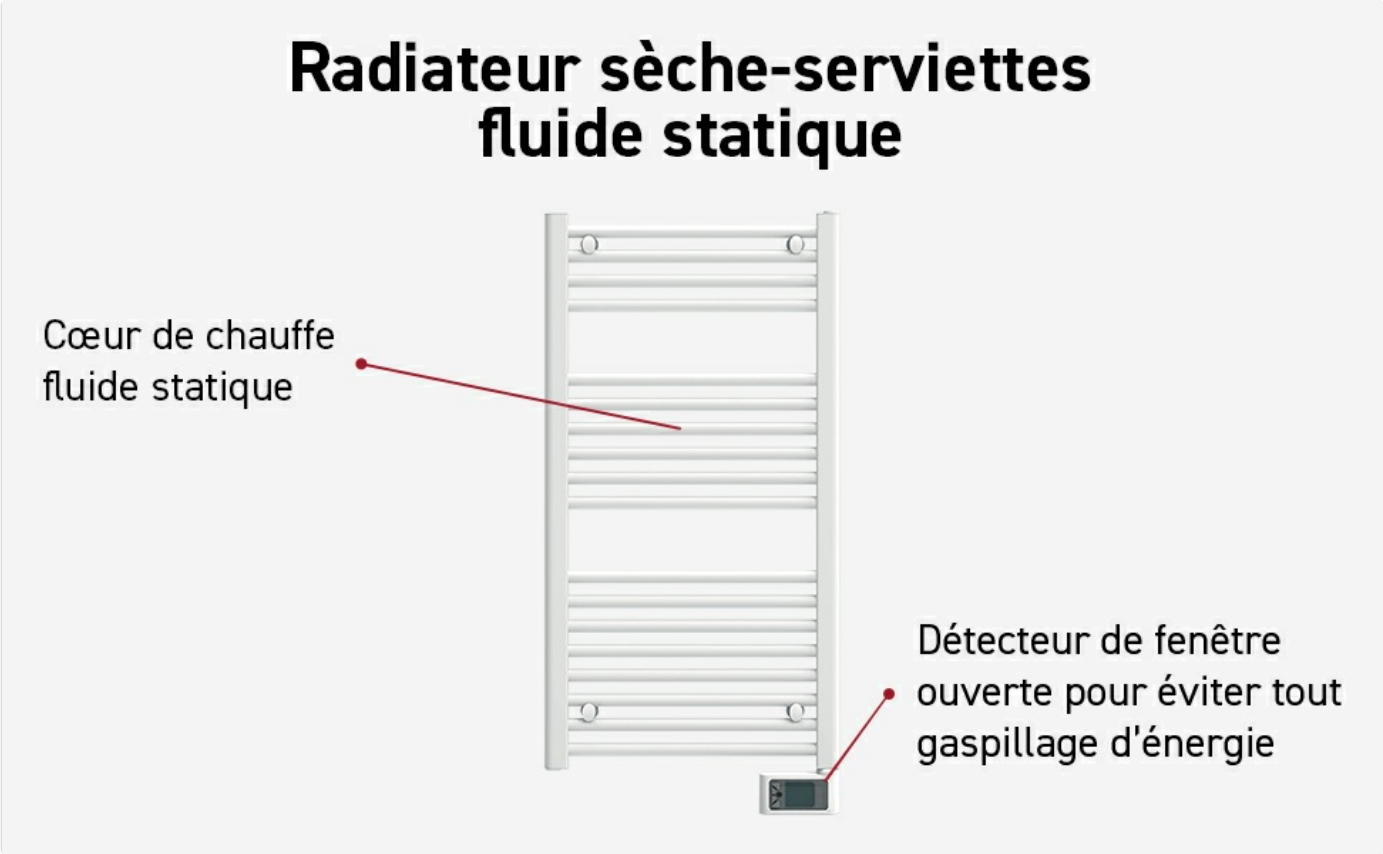

Image 3: Diagram illustrating the internal static fluid heating core and the open window detection feature.

6.1 Daily and Weekly Programming

Access the programming menu via the control panel to set specific heating schedules for different times of the day and days of the week. This allows the radiator to operate only when needed, saving energy.

6.2 Open Window Detector

The integrated open window detector automatically senses a sudden drop in temperature, indicating an open window. In such cases, the radiator temporarily pauses heating to prevent energy waste. Heating resumes once the window is closed and the temperature stabilizes.

7. Maintenance

Regular maintenance ensures the longevity and efficient operation of your towel radiator.

- **Cleaning:** Disconnect the radiator from the power supply before cleaning. Wipe the surface with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish.
- **Inspection:** Periodically check the power cord and plug for any signs of damage. Ensure all wall fixings remain secure.

8. Troubleshooting

If you encounter issues with your NOIROT Floba Towel Radiator, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Radiator does not heat	No power supply; Open window detected; Incorrect mode selected	Check power connection and circuit breaker; Close windows/doors; Select appropriate heating mode.
Display is blank	No power supply; Appliance is off	Check power connection; Press the power button.
Radiator heats intermittently	Programmed schedule active; Open window detected	Review your heating schedule; Ensure windows are closed.

If the problem persists after attempting these solutions, please contact customer support.

9. Specifications
