SAFETY INSTRUCTIONS

Adhering to these safety guidelines is crucial for preventing injury and damage to the product.

- Always assemble the cabinet on a clean, soft surface to prevent scratches.
- Ensure all screws and fasteners are tightened securely before use. Periodically check and re-tighten if necessary.
- Do not overload drawers. Distribute weight evenly to maintain stability.
- Avoid placing hot items directly on the worktop without protective mats.
- Keep the cabinet away from direct heat sources and excessive moisture.
- If possible, secure the cabinet to the wall using appropriate anti-tip hardware (not included) to prevent accidental tipping, especially in households with children or pets.
- Keep small parts and assembly hardware out of reach of children during assembly.

ASSEMBLY INSTRUCTIONS

Please follow these steps carefully for proper assembly. It is recommended to have two people for assembly.

Tools Required:

- Screwdriver (Phillips head)
- Hammer (optional, for dowels)
- Measuring tape (optional, for placement)

Assembly Steps:

1. **Unpack and Identify Components:** Carefully unpack all parts and hardware. Refer to the included parts list (if provided) to ensure all components are present and undamaged.
2. **Assemble the Cabinet Frame:** Begin by attaching the side panels to the base and back panel using the provided screws and dowels. Ensure all connections are firm and square.
3. **Install Drawer Slides:** Attach the drawer slides to the inner sides of the cabinet frame according to the pre-drilled holes. Ensure they are level and aligned.
4. **Assemble Drawers:** Construct each of the three drawers by attaching the side panels, front panel, and back panel to the drawer base. Install the corresponding drawer slides onto the assembled drawers.
5. **Insert Drawers:** Carefully slide each assembled drawer onto its respective slides within the cabinet frame. Ensure they glide smoothly.
6. **Attach Handles:** Secure the handles to the front of each drawer using the provided screws.
7. **Place the Worktop:** Position the worktop securely on top of the assembled cabinet frame. Depending on the design, it may be secured with screws from underneath or simply rest in place.
8. **Final Check:** Verify that all screws are tightened, drawers open and close smoothly, and the cabinet is stable.

OPERATING INSTRUCTIONS

The AKORD Oliwia S80 cabinet is designed for straightforward use.

- **Drawer Operation:** To open a drawer, gently pull the handle outwards. To close, push the drawer inwards until it is fully seated. Avoid slamming drawers to prevent damage to the slides and cabinet structure.
- **Worktop Use:** The worktop provides a durable surface for kitchen tasks. While resistant to abrasion, it is advisable to use cutting boards for chopping and heat-resistant mats for hot pots and pans to preserve its appearance.
- **Storage:** Utilize the three spacious drawers for organized storage of cutlery, utensils, small appliances, or pantry items. Distribute weight evenly within drawers to ensure smooth operation and prevent strain on the drawer slides.

MAINTENANCE AND CARE

Regular cleaning and proper care will help maintain the appearance and longevity of your cabinet.

- **Cleaning Surfaces:** For daily cleaning, wipe the cabinet surfaces (body, drawer fronts, and worktop) with a soft cloth dampened with water and a mild, non-abrasive detergent.
- **Stubborn Stains:** For more stubborn stains, use a specialized furniture cleaner suitable for laminated surfaces, following the product's instructions. Always test on an inconspicuous area first.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, ammonia-based cleaners, or harsh chemicals, as these can damage the finish and ABS edges.
- **Drying:** Always dry surfaces immediately after cleaning with a clean, dry cloth to prevent water spots or moisture damage, especially around the edges.
- **Drawer Slides:** Periodically check drawer slides for smooth operation. If they become stiff, a small amount of silicone-based lubricant can be applied to the tracks.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

Problem	Possible Cause	Solution
Drawers do not slide smoothly.	Misaligned slides, debris in tracks, overloaded drawer.	Check slide alignment, clean tracks, redistribute drawer contents. Apply silicone lubricant if needed.
Cabinet feels wobbly or unstable.	Loose fasteners, uneven floor.	Ensure all assembly screws are tightened. Use shims under the base if the floor is uneven. Consider securing to a wall.
Drawer front is crooked.	Improperly installed drawer front or slides.	Re-check the attachment of the drawer front to the drawer box and the alignment of the drawer slides.
