

StarTech HB31C3A1CDPPD3

StarTech.com 4-Port USB-C Hub with USB-C DP Alt Mode Video Output 4K 60Hz

Model: HB31C3A1CDPPD3

INTRODUCTION

This manual provides comprehensive instructions for the StarTech.com 4-Port USB-C Hub (Model: HB31C3A1CDPPD3). This device expands your USB-C enabled computer's connectivity, offering multiple USB 3.2 Gen 2 (10Gbps) ports and a USB-C port with DisplayPort Alternate Mode for video output, alongside 100W Power Delivery pass-through. It is designed for seamless integration with various operating systems, including Windows, macOS, ChromeOS, iPadOS, and Android.

PACKAGE CONTENTS

- 1 x StarTech.com 4-Port USB-C Hub (HB31C3A1CDPPD3)
- 1 x User Manual

PRODUCT FEATURES AND OVERVIEW

The StarTech.com HB31C3A1CDPPD3 hub is equipped with the following features:

- **4-Port USB 3.2 Gen 2 (10Gbps) Expansion:** Includes three USB-A ports and one USB-C port for connecting various peripherals.
- **USB-C DisplayPort Alternate Mode:** The downstream USB-C port supports video output up to 4K 60Hz, allowing connection to compatible USB-C portable or desktop monitors.
- **100W Power Delivery 3.0 Pass-Through:** Enables charging of the host laptop by connecting its USB-C power supply to the hub's PD port, reserving 18W for the adapter and providing up to 82W for laptop charging.
- **Integrated 1ft (30cm) USB-C Host Cable:** Provides flexible placement and reduces strain on the host device's port.
- **Overcurrent Protection (OCP) & Wake on USB:** Enhances device safety and functionality.
- **Driverless Setup:** Automatically detected and configured upon connection to a host computer.
- **Connectivity Tools:** Includes USB Event Monitoring and Windows Layout utilities for IT professionals.

SETUP INSTRUCTIONS

1. **Connect the Hub to Your Host Device:** Plug the integrated USB-C host cable of the HB31C3A1CDPPD3

hub into an available USB-C port on your laptop, desktop, or compatible mobile device.

2. Connect Peripherals:

- For USB-A devices (e.g., keyboards, mice, external drives), connect them to the three USB-A 10Gbps ports.
- For USB-C devices requiring data transfer, connect them to the USB-C 10Gbps port.

3. **Connect a USB-C Monitor (Optional):** If your host computer supports USB-C DisplayPort Alternate Mode, connect a USB-C portable or desktop monitor to the USB-C 10Gbps port labeled "VIDEO OUT". Ensure your monitor supports video input via USB-C.

4. **Connect Power Delivery (Optional, Recommended for Video Output):** To charge your host laptop and ensure stable power for connected devices, especially a USB-C monitor, connect your host laptop's USB-C power adapter to the USB-C port labeled "PD Pass-Through" on the hub. This port supports up to 100W Power Delivery 3.0.

USB-C Video Output

- ✓ Supports video out to a 4K 60Hz USB-C monitor
- ✓ 100W Power Delivery 3.0 pass through
- ✓ Extra long cable attached (1ft/30 cm)
- ✓ USB bus powered or via external USB-C power adapter

OPERATING INSTRUCTIONS

The StarTech.com HB31C3A1CDPPD3 hub is designed for plug-and-play functionality. Once connected, your operating system should automatically detect and configure the hub and any connected devices.

- **Data Transfer:** Use the USB-A and USB-C data ports to connect and transfer data with your USB devices at speeds up to 10Gbps.
- **Video Output:** When a USB-C monitor is connected to the "VIDEO OUT" port, your host device should extend or mirror its display. Ensure your host device's USB-C port supports DisplayPort Alternate Mode. For stable video output, especially with 4K 60Hz monitors, it is highly recommended to connect an external USB-C power adapter to the hub's PD Pass-Through port.
- **Power Delivery:** The PD Pass-Through port allows your host laptop to receive power through the hub. This is crucial for maintaining battery charge while using power-intensive peripherals or external displays.
- **Connectivity Tools (Windows Only):** StarTech.com provides optional software utilities for Windows users to enhance management and troubleshooting:
 - **USB Event Monitoring:** Logs and timestamps USB device connections and disconnections, useful for system administrators.

- **Windows Layout Utility:** Helps restore application window locations upon reconnecting to the hub, improving workflow efficiency.

These tools can be downloaded from the [StarTech.com](https://www.startech.com) website.

MAINTENANCE

To ensure the longevity and optimal performance of your StarTech.com USB-C Hub, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to clean the exterior of the hub. Avoid using abrasive cleaners, solvents, or strong chemicals, as they may damage the surface.
- **Storage:** Store the hub in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the device or subjecting it to strong impacts. Do not bend or excessively pull the integrated USB-C cable.
- **Ventilation:** Ensure the hub is placed in an area with adequate airflow to prevent overheating, especially during prolonged use with power-intensive devices.

TROUBLESHOOTING

If you encounter issues with your StarTech.com USB-C Hub, refer to the following common troubleshooting steps:

- 1. No Power or Intermittent Connectivity:**
 - Ensure the hub's integrated USB-C host cable is securely connected to your computer's USB-C port.
 - If using Power Delivery, verify that your USB-C power adapter is properly connected to the hub's "PD Pass-Through" port and that it provides sufficient wattage (e.g., 60W or higher for laptops).
 - Try connecting the hub to a different USB-C port on your host device, if available.
- 2. No Video Output to USB-C Monitor:**
 - Confirm that your host computer's USB-C port supports DisplayPort Alternate Mode. Not all USB-C ports support video output.
 - Ensure the USB-C monitor is connected to the hub's "VIDEO OUT" port.
 - Connect an external USB-C power adapter to the hub's "PD Pass-Through" port. Some USB-C monitors require the hub to be externally powered to function correctly.
 - Try disconnecting and reconnecting the USB-C monitor cable from the hub.
 - Check your computer's display settings to ensure the external monitor is detected and configured (e.g., extended or duplicated display).
- 3. USB Devices Not Recognized:**
 - Ensure the USB device is fully inserted into the hub's port.
 - Try connecting the USB device to a different port on the hub.
 - If it's a high-power USB device (e.g., external hard drive), ensure the hub is receiving sufficient power via the PD Pass-Through port.
 - Restart your host computer.

SPECIFICATIONS

Attribute	Value
Brand	StarTech.com
Model Number	HB31C3A1CDPPD3

Connectivity	3x USB-A (10Gbps), 1x USB-C (10Gbps, DP Alt Mode Video Out), 1x USB-C (PD Pass-Through)
Video Output Resolution	Up to 4K 60Hz (via USB-C DP Alt Mode)
Power Delivery	100W PD 3.0 Pass-Through (up to 82W for host charging)
Host Connector	Integrated USB-C Cable (1ft/30cm)
Operating System Compatibility	Windows, macOS, ChromeOS, iPadOS, Android
Dimensions (LxWxH)	3.9 x 2.1 x 0.6 inches (98 x 54 x 16 mm)
Item Weight	3.52 ounces (100 g)
Color	Space Gray
