- **Adjusting Shelves:** The cabinet features multiple pre-drilled holes along the interior sides. 7. MAINTENANCE

To ensure the longevity and appearance of your winiowa Metal Pantry Cabinet, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth and mild soap. Avoid abrasive cleaners or harsh chemicals that could damage the powder coating. Dry immediately with a clean cloth.
- **Hardware:** Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary.
- **Adjustable Feet:** Ensure the adjustable feet remain properly set to keep the cabinet level and stable.
- **Door Alignment:** If doors become misaligned over time, refer to the troubleshooting section or the provided manual for adjustment instructions.

8. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Uneven Door Panels:** If the two door panels appear uneven in height, adjust the bottom adjustment foot on the affected side to make it flat.
- **Door Protrudes Outward:** This can occur because the door is made of steel plate and has some stretchability. Adjust the door hinges or alignment as shown in the detailed manual.
- **Shelves Dropping:** If shelves are consistently dropping, ensure the plastic shelf clips are correctly inserted into the designated holes and are not damaged. Replace any broken clips. Avoid overloading shelves.
