3.3 Storage Expansion

The Mini PC comes with a 256GB M.2 SSD. You can expand the storage in two ways:

- **M.2 SSD Upgrade:** The existing M.2 SSD can be upgraded to a maximum of 2TB.
- **2.5" SATA HDD/SSD:** You can add a 2.5-inch 7mm SATA HDD or SSD (not included) for additional storage. Use the provided SATA cable and screws for installation.

4. MAINTENANCE

4.1 General Care

- Keep the Mini PC in a clean, dry environment, away from direct sunlight and excessive heat.
- Avoid placing heavy objects on top of the device.
- Do not expose the device to water or other liquids.
- Clean the exterior with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.

4.2 Cooling System

The AWOW AK10 Pro Mini PC features an internal cooling fan to maintain optimal operating temperatures. Ensure that the ventilation openings on the device are not blocked to allow for proper airflow. Regularly check for dust accumulation and gently clean the vents if necessary.

5. TROUBLESHOOTING

If you encounter issues with your AWOW AK10 Pro Mini PC, refer to the following common troubleshooting steps:

- **No Power:**

- Ensure the power adapter is securely connected to both the Mini PC and a working power outlet.
- Verify the power outlet is functional by plugging in another device.

- **No Display:**

- Check that the HDMI/DP cable is firmly connected to both the Mini PC and the monitor.
- Ensure the monitor is powered on and set to the correct input source (HDMI/DP).
- Try a different HDMI/DP cable or monitor if possible.

- **No Internet Connection:**

- **Wired:** Check the Ethernet cable connection and your router/modem status.
- **Wireless:** Ensure Wi-Fi is enabled in Windows settings and you are connected to the correct network with the correct password.

- **Slow Performance:**

- Close unnecessary applications running in the background.
- Ensure Windows is up to date.
- Check for malware or viruses.
- Ensure adequate ventilation to prevent overheating.

- **CMOS Reset:** If you experience boot issues or incorrect BIOS settings, use the CMOS CLR button (a small pinhole button usually next to the power button) to reset the BIOS to default settings. You may need a paperclip to press it.

If these steps do not resolve your issue, please contact AWOW customer support for further assistance.
