OiLiehu B0CJFGKPTK

OiLiehu Android 13 Car Stereo Instruction Manual

Model: B0CJFGKPTK for Honda Accord 9th 2.4L (2013-2016)

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your OiLiehu Android 13 Car Stereo. Please read this manual thoroughly before using the product to ensure proper function and safety.

VEHICLE COMPATIBILITY

This car stereo is specifically designed for the Honda Accord 9th generation 2.4L models manufactured between 2013 and 2016. Before installation, verify your vehicle's central control panel and adapter connector match the requirements. Some models may require an additional protocol box. Please consult with customer service if you have any doubts regarding compatibility.

9 inch Touchscreen Android Car Stereo For Honda Accord 9th 2.4L 2013-2016

Image: This diagram illustrates the compatible (Option A: 2016 Accord 2.4) and incompatible (Option B: 2014-2016 Accord 2.0, Option C: 2013-2015 Accord 2.4) central control panel configurations. Ensure your vehicle's panel matches Option A for proper fitment.

SETUP AND INSTALLATION

Pre-Installation Checklist:

- Ensure the vehicle's ignition is off and the battery is disconnected.
- Confirm compatibility with your specific Honda Accord 9th 2.4L model (2013-2016).
- Gather all necessary tools, including the provided installation tool.

Wiring Connections:

Connect the power cable, RCA cables, GPS antenna, and rear camera cable according to your vehicle's wiring diagram and the provided instructions. Pay close attention to the specific connectors for your Honda Accord model. If a protocol box is required for your vehicle, ensure it is correctly integrated into the wiring harness.

Mounting the Unit:

Carefully mount the car stereo unit into the dashboard. Ensure all cables are securely connected and not pinched. Reconnect the vehicle battery once all connections are verified.

Initial Power-On:

After installation, turn on the vehicle's ignition. The stereo should power on. Follow any on-screen prompts for initial setup, such as language selection and time zone.

OPERATING INSTRUCTIONS

Wireless Apple CarPlay & Android Auto:

The unit supports both wireless Apple CarPlay and wired Android Auto. This allows for seamless integration of your smartphone's features, including navigation, calls, messages, and music, directly onto the car stereo display.

Wireless CarPlay Connection Steps:

1. Connect your iPhone to the stereo via Bluetooth.
2. Open the "ZLINK" application on the stereo and wait for the connection to establish.

Wired Android Auto Connection Steps:

1. Connect your Android phone to the stereo using a USB cable.
2. Open the "ZLINK" application on the stereo and wait for the connection to establish.

Wireless Apple Carplay & Android Auto

Wireless Connection Steps:

1. Connect BT
2. Click "ZLINK" and wait for connection

Wireless Connection Steps:

1. Connect BT
2. Turn ON "Wi-Fi hotspot" of the radio
3. Turn on Phone WLAN, find the hotspot name and connect
4. Click "ZUNK" and wait for connection

Bluetooth 5.1:

Connect your smartphone via Bluetooth 5.1 for hands-free calling and audio streaming. The built-in microphone ensures clear communication. You can manage calls, access your phonebook, and play music directly from your device.

Image: The car stereo display showing the Bluetooth calling interface with a dial pad and call management options.

Steering Wheel Control (SWC):

The car stereo supports your vehicle's existing steering wheel controls. This allows you to manage functions like volume, track skipping, and answering calls without taking your hands off the wheel. Configuration may be required in the stereo settings under "Steering Learn".

Image: The car stereo display showing the "Steering Learn" menu, where users can configure steering wheel control buttons.

Split Screen Functionality:

Utilize the split-screen feature to run two applications simultaneously, such as navigation and music playback. This enhances multitasking capabilities while driving.

Using Split Screen:

1. Open the first application you wish to use in split screen.
2. Click the split screen button (usually a double-rectangle icon) in the status bar.
3. Drag the application to one side of the screen.
4. Select the second application for the other side of the screen.

Image: The car stereo display demonstrating the split-screen function, with a navigation app on one side and a music player on the other.

AHD Rear Camera Input:

The unit supports AHD high-definition 720P camera image input. When reversing, the AHD camera image will automatically display on the touchscreen, providing a clear view of the area behind your vehicle. You can switch between CVBS and AHD camera types in the settings.

Audio Settings (Hi-Fi & EQ):

The stereo features Hi-Fi sound quality and adjustable sound effects. Access the "Sound Effects" menu to customize equalizer settings and optimize audio output to your preference. Note: This unit is not suitable for vehicles equipped with Bose speaker systems.

MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or solvents that could damage the display.
- **Software Updates:** Periodically check for available software updates to ensure optimal performance and access to new features. Updates can typically be found through the system settings or the manufacturer's website.
- **General Care:** Keep the unit free from dust and extreme temperatures. Ensure proper ventilation around the unit to prevent overheating.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Incorrect wiring; Blown fuse; Vehicle battery disconnected.	Check all power connections. Verify vehicle fuses. Ensure battery is connected.
No sound output.	Volume too low; Mute activated; Speaker wiring issue; Incompatible speaker system (e.g., Bose).	Increase volume. Check mute status. Verify speaker connections. Confirm compatibility with vehicle's audio system.
GPS signal weak or inaccurate.	GPS antenna obstructed or improperly installed; No WiFi connection for online maps.	Ensure GPS antenna has a clear view of the sky and is securely connected. Connect to WiFi for online map data.
CarPlay/Android Auto not connecting.	Incorrect connection steps; Phone not compatible; USB cable faulty (for Android Auto); Bluetooth issue (for CarPlay).	Review connection steps. Ensure phone is compatible. Try a different USB cable. Re-pair Bluetooth for CarPlay.
Steering Wheel Controls not working.	SWC wiring incorrect; SWC learning not performed.	Verify SWC wiring. Perform "Steering Learn" in the stereo settings.

If you encounter issues not listed here, or if the suggested solutions do not resolve the problem, please contact customer support.
