Winchester SECWINR26-TT-E

Winchester Ranger 26 Two Tone E-Lock Instruction Manual

Model: SECWINR26-TT-E

PRODUCT OVERVIEW

The Winchester Ranger 26 Two Tone E-Lock safe is designed for secure storage of valuable items, offering robust protection against fire and unauthorized access. Built with reliability and integrity, this safe ensures the safety of your firearms, important documents, and family heirlooms. It features an electronic lock with a backlit keypad, a 60-minute fire rating at 1400°F, and is pre-drilled for anchoring to the floor.

SETUP

Unpacking and Placement

The Winchester Ranger 26 safe weighs approximately 593 pounds when empty. Due to its significant weight and dimensions (25 x 30 x 59 inches), professional assistance is highly recommended for delivery and placement. Ensure the safe is placed on a level, stable surface capable of supporting its weight and contents. The safe is pre-drilled for anchoring to the floor, which is highly recommended for enhanced security.

Handle Assembly

The safe's handle requires minor assembly. Apply a small amount of threadlocker or appropriate adhesive (not included) to the threads of the handle spokes before screwing them firmly into the central hub. This ensures a secure and lasting connection for the locking mechanism.

Electronic Lock Setup

The safe is equipped with an electronic lock featuring a backlit keypad. Upon initial setup, you will need to change the default combination to a new, secure code of your choosing. Refer to the separate electronic lock manual for detailed instructions on programming your personal combination. The process is designed to be quick and straightforward, typically taking less than 30 seconds.

OPERATING THE SAFE

Opening the Safe

1. Enter your programmed combination on the electronic keypad. The backlit feature assists in low-light conditions.
2. Once the correct code is entered, turn the handle to the right. The door will disengage from the locking bolts and pop open slightly.
3. Pull the door open to access the interior.

Figure 2: Electronic lock and handle for safe operation.

Closing and Locking the Safe

1. Gently push the door closed until it is flush with the safe body.
2. Turn the handle to the left to engage the locking bolts. Ensure the handle is fully turned until it stops, indicating the bolts are securely extended.
3. Verify the safe is locked by attempting to pull the door open without entering the code.

INTERIOR FEATURES AND ORGANIZATION

The interior of the Winchester Ranger 26 safe is designed for maximum versatility and protection of your valuables.

Padded Interior and Adjustable Shelving

The entire interior is lined with a soft, gray padding to protect contents from scratches and impacts. The safe includes adjustable shelving that can be reconfigured to suit your specific storage needs, whether for firearms, documents, or other valuables. The shelving system utilizes vertical tracks, allowing for easy adjustment of shelf height.

Door Organizer

The inside of the safe door features multiple panels and pouches, ideal for storing smaller items such as passports, cash, important documents, or handguns. These pockets help maximize storage efficiency and keep frequently accessed items organized.

Gun Rack System

The safe is designed with a gun rack system to securely hold firearms upright. This system can be integrated with the adjustable shelving to create optimal storage configurations for both long guns and other items.

Included Accessories

- **Motion-sensing LED light kit:** Provides illumination inside the safe for easy visibility of contents.
- **Included dehumidifier:** Helps protect contents from moisture and humidity, crucial for preserving firearms and documents.

MAINTENANCE AND SAFETY

Fire Resistance

The Winchester Ranger 26 safe boasts a 60-minute fire rating at 1400°F, providing significant protection for your valuables in the event of a fire. This rating ensures that the internal temperature remains below critical levels for a specified duration.

California DOJ Requirements

This safe meets California Department of Justice (DOJ) requirements, ensuring it adheres to specific safety and security standards for firearm storage.

Electronic Lock Battery

The electronic lock operates on a 9-volt battery. It is recommended to replace the battery annually or at the first sign of low power (e.g., dimming keypad lights, slow response). A backup key is provided to ensure access in case of battery failure or forgotten combination.

TROUBLESHOOTING

- **Safe not opening with code:** Ensure the battery in the electronic lock is not depleted. Replace the 9-volt battery if necessary. Double-check that the correct combination is being entered. If issues persist, use the provided backup key.
- **Handle not turning:** Ensure the door is fully closed and flush with the safe body before attempting to turn the handle to lock. If the handle feels stiff, ensure no obstructions are preventing the locking bolts from extending.
- **Interior lighting not working:** Check the batteries in the motion-sensing LED light kit. Ensure the sensor is not obstructed.
