INSTALLATION AND REPLACEMENT

To install a Bitvae replacement toothbrush head, align it with the shaft of your compatible Oral-B Braun electric toothbrush handle and push it down until it clicks securely into place.

For optimal dental hygiene, it is recommended to replace the toothbrush head every 3 months, or sooner if the bristles appear worn or frayed.

USAGE GUIDELINES

Once installed, apply a small amount of toothpaste to the bristles.

Place the brush head against your teeth at a slight angle towards the gumline.

Turn on your electric toothbrush and guide the brush head slowly from tooth to tooth, allowing the bristles to clean each surface. Do not scrub vigorously.

Ensure all surfaces of your teeth are cleaned, including the outer, inner, and chewing surfaces.

MAINTENANCE AND CARE

After each use, rinse the brush head thoroughly under running water to remove any toothpaste residue and debris.

Store the brush head upright in a clean, dry place to allow it to air dry.

Do not use harsh cleaning agents or abrasive materials on the brush head.

SAFETY INFORMATION

For external oral use only.

Keep out of reach of children.

If you experience any discomfort or pain during use, discontinue use and consult a dental professional.

Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition.

TROUBLESHOOTING

Brush head does not fit:

- Ensure your electric toothbrush handle is a compatible Oral-B Braun model (not iO or Sonic).
- Verify the brush head is aligned correctly before pushing it onto the shaft.

Bristles appear worn quickly:

- This may indicate excessive pressure during brushing. Apply lighter pressure.
- Ensure you are replacing the brush head every 3 months as recommended.
