## 3. SETUP AND INITIAL USE

### 3.1 For iPhone/iPad Users

1. **Download the App:** When you first connect the flash drive to your iPhone or iPad, a prompt will appear to download the "LESOGÉ" app from the App Store. This app is essential for managing files and utilizing the drive's features on iOS devices.
2. **Install and Open:** Follow the on-screen instructions to install the app. Once installed, open the "LESOGÉ" app.
3. **Grant Permissions:** The app may request access to your photos, contacts, or other data. Grant the necessary permissions to enable full functionality.
4. **Connect the Drive:** Ensure the Lightning connector of the flash drive is securely inserted into your iPhone or iPad's Lightning port.

## Small and convenient

With a keychain design, no longer worry about losing it

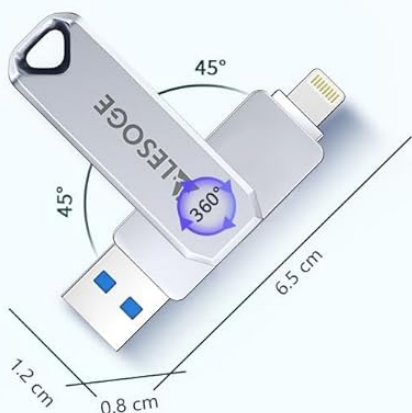

### For iPhone/iPad users:

Need to install dedicated Apple MFi certificate APP

### For PC & Android users:

plug and play, no need to download any APP

#### Please Note:

For cloud transfers: If your files are backed up to iCloud, you must first download them to your phone or tablet before transferring them to the USB flash drive.  
App requirements: iPhone/iPad users need to download the "LESOGÉ" app from the App Store to use the USB drive. Android phone users only need to enable the OTG function, with no app download required. PCs are plug-and-play.

## 3.2 For Android/PC Users

For Android devices (with OTG support) and PCs, no additional app download is required. The flash drive operates as a standard plug-and-play device.

### 1. **Connect the Drive:**

- For Android: Use the Type-C adapter (if your device has a Type-C port) or the standard USB connector with an appropriate adapter if needed. Ensure your Android device supports OTG (On-The-Go) functionality.
- For PC: Insert the USB 3.0 connector into an available USB port on your computer.

### 2. **Access Files:** The device will be recognized as external storage. You can access and manage files directly through your device's file manager (Android) or File Explorer/Finder (PC).

## 4.2 Transferring Files (Android/PC)

For Android and PC devices, file transfer is similar to using any standard USB drive:

1. Connect the flash drive to your device.
2. Open your device's file manager or file explorer.
3. Locate the files you wish to transfer on your device or the flash drive.
4. Copy or cut the files and paste them to the desired location on the other device.

## 4.3 Direct Media Playback

The flash drive supports direct playback of various media files. Simply navigate to the media file on the drive using the "LESOGÉ" app (iOS) or your device's file manager (Android/PC) and open it with a compatible media player.

## 5. FILE MANAGEMENT AND SECURITY

The LESOGE flash drive offers robust file management and security features, including the ability to encrypt specific files to protect your privacy.

### 5.1 Encrypting Files

Within the "LESOGE" app (iOS), you can select specific files or folders and apply encryption. This typically involves setting a password or using Touch ID for access, ensuring that sensitive data remains secure even if the drive is lost

or accessed by unauthorized individuals.

## 6. MAINTENANCE AND CARE

- **Physical Protection:** While the drive is designed to be waterproof and shockproof, avoid prolonged exposure to extreme conditions or intentional submersion.
- **Temperature:** Store the drive within recommended temperature ranges to ensure optimal performance and longevity.
- **Magnetic Fields:** Keep the drive away from strong magnetic fields to prevent data corruption.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the drive. Do not use liquid cleaners or abrasive materials.
- **Safe Removal:** Always safely eject the flash drive from your computer or device before physically disconnecting it to prevent data loss or corruption.

## 7. TROUBLESHOOTING

- **Drive Not Recognized (iOS):**
  - Ensure the "LESOGE" app is installed and open.
  - Verify the Lightning connector is fully inserted.
  - Check if your iOS version is 12.1 or above.
- **Drive Not Recognized (Android/PC):**
  - Ensure the drive is fully inserted into the USB or Type-C port.

- For Android, confirm your device supports OTG functionality.
- Try a different USB port on your PC.

- **Transfer Failure:**

- On iOS, ensure your phone screen remains active during the transfer. Locking the screen can interrupt the process.
- Check for sufficient space on the destination device.
- Ensure the drive is securely connected.

- **Files Disappearing/Corrupted:**

- Always use the "Safely Remove Hardware" option on PC or eject the drive properly from Android/iOS before disconnecting.
- Avoid sudden disconnections during read/write operations.

- **Slow Transfer Speeds:**

- Ensure you are using a USB 3.0 port on your PC for optimal speeds.
- Large file transfers may naturally take longer.
