5.2 Ironing Techniques

The Atlodas Mini Steam Iron supports both flat ironing and vertical steaming.

Flat Ironing

1. Place the garment on an ironing board or a flat, heat-resistant surface.

5.3 Powering Off

Once ironing is complete, press the Power Button to turn off the iron. Unplug the iron from the electrical outlet and allow it to cool down completely before storing.

6. Maintenance and Care

6.1 Cleaning the Soleplate

To clean the titanium soleplate, ensure the iron is unplugged and completely cool. Wipe the soleplate with a soft, damp cloth. Do not use abrasive cleaners or scouring pads, as these can damage the surface.

6.2 Emptying and Storing the Water Tank

After each use, it is recommended to empty any remaining water from the tank to prevent mineral buildup. Store the iron in a dry, safe place, away from children, once it has cooled down.

6.3 Descaling (If Necessary)

If you notice reduced steam output or mineral residue, descaling may be necessary. Consult customer support for specific descaling instructions or use a commercially available iron descaling solution according to its directions. Always ensure the iron is unplugged and cool before attempting any descaling process.

7. Troubleshooting

Refer to the following table for common issues and their solutions.

Problem	Possible Cause	Solution
Iron does not heat up.	Not plugged in; power outlet malfunction; iron is off.	Ensure the iron is securely plugged in. Check the power outlet with another appliance. Press the Power Button to turn on the iron.
No steam or low steam output.	Water tank is empty; iron not hot enough; mineral buildup.	Refill the water tank. Allow the iron to preheat completely. Perform descaling if necessary.
Water leaks from the soleplate.	Water tank overfilled; iron not hot enough for steam; iron tilted excessively.	Do not overfill the water tank. Allow the iron to reach full temperature before using steam. Keep the iron as level as possible during use.
Wrinkles not removed effectively.	Insufficient heat; lack of steam; fabric type.	Ensure the iron is fully preheated. Use the steam spray function. Check garment care labels for appropriate ironing temperatures.

If the problem persists after attempting these solutions, please contact customer support.
