Tablet does not power on	Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again. If unresponsive, perform a force restart by holding the power button for 10-15 seconds.
Wi-Fi connectivity issues	Restart your Wi-Fi router and the tablet. Forget the network in Wi-Fi settings and reconnect. Ensure you are within range of the Wi-Fi signal.
Slow performance	Close unused applications. Clear cache for frequently used apps. Check for system updates. Consider uninstalling unnecessary apps or moving large files to external storage.
Apps crashing or freezing	Force close the app from recent apps. Clear the app's cache and data in Settings > Apps. Reinstall the app if the problem persists. Ensure the tablet's software is up to date.
Touchscreen unresponsive	Restart the tablet. If the issue persists, a factory reset might be necessary (back up your data first).
