Gizoon BF81-Y

Gizoon Full Lift Up Storage Bed Instruction Manual

Model: BF81-Y

Safety Information Package Contents Setup & Assembly Operating Instructions Maintenance Troubleshooting Specifications Warranty & Support

Introduction

Thank you for choosing the Gizoon Full Lift Up Storage Bed. This manual provides essential information for the safe assembly, operation, and maintenance of your new bed frame. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

Safety Information

- This bed frame has a maximum weight recommendation of up to **800 pounds**. Do not exceed this weight limit.
- **Improper assembly** can lead to instability or collapse. Always follow the assembly instructions provided precisely.
- Ensure all connections are securely tightened before use. Periodically check and re-tighten fasteners as needed.
- Keep small parts and packaging materials away from children to prevent choking hazards.
- Use the bed frame on a flat, level surface to ensure stability.
- When lifting the bed for storage access, ensure hands and fingers are clear of moving parts to prevent injury.

Package Contents

Before assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Headboard
- Slats (wood slats with plastic buckles)
- Bed Frame (steel frame components)
- Hydraulic Lifting System
- Anti-falling devices
- Hand-lifting strap

- Assembly Hardware (screws, bolts, nuts, etc.)
- Screwdriver (included)

Setup & Assembly

Assembly of the Gizoon Lift Up Storage Bed requires careful attention to detail. We recommend**2-3 people** for assembly, though time may vary by experience. An electric screwdriver can be used (not included) to expedite the process.

Preparation:

- Ensure you have an adequate workspace.
- Take inventory of all components before you begin.
- Wear gloves to prevent injury during handling.

Assembly Steps:

1. Follow the step-by-step instructions provided in your product's assembly manual.
2. Assemble the main bed frame structure, ensuring all connections are secure.
3. Attach the upholstered wingback headboard. The winged design helps keep the mattress securely in place.
4. Install the hydraulic lifting system. Ensure the hydraulics are correctly oriented and securely fastened.
5. Attach the wood slats using the easy-to-assemble buckles. These slats provide robust support for your mattress.
6. Install the practical anti-falling devices along the bed frame to prevent mattress slipping.
7. Attach the hand-lifting strap for easy access to the storage area.

For any assembly questions, please contact customer support.

Operating Instructions

Accessing Under-Bed Storage:

1. Locate the hand-lifting strap at the foot of the bed.
2. Firmly pull the strap upwards to engage the hydraulic lifting system. The bed platform will lift smoothly, revealing the storage compartment.
3. The hydraulic system is designed for durability and can handle up to **100,000 lifts**.
4. The maximum weight capacity for lifting the bed platform (including mattress) is **100 lbs**. Do not place excessive weight on the platform when lifting.
5. To close, gently push the bed platform down until it locks into place. *Note: It may require a firm push to fully engage the closing mechanism, especially when the mattress is not yet on the bed or is very light.*

The under-bed storage area provides approximately **10.8 inches** of height (from slats to floor), ideal for storing various items like suitcases, quilts, clothes, and boxes.

Maintenance

- **Cleaning Upholstery:** The upholstered parts of the bed frame should be **dry cleaned only**. Do not use liquid cleaners or abrasive materials.
- **Frame Cleaning:** Wipe metal and wood surfaces with a soft, damp cloth. Avoid harsh chemicals.
- **Regular Checks:** Periodically inspect all bolts, screws, and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent noise.
- **Hydraulic System:** The hydraulic system is designed for long-term use. If you notice any issues with lifting or lowering, refer to the troubleshooting section.

Troubleshooting

Problem	Possible Cause	Solution
Bed platform does not lower after lifting.	Hydraulic pistons require initial force to compress, especially without a mattress or with a very light mattress.	Apply significant downward pressure to the bed platform to initiate the closing mechanism. This is normal for new hydraulic systems. Once a mattress is placed, its weight will assist in lowering.
Mattress slides on the bed frame.	Anti-falling devices are not installed or are loose.	Ensure the practical anti-falling devices are correctly installed and securely fastened at the head of the bed.
Squeaking or noise from the bed frame.	Loose connections or friction between metal parts.	Check and re-tighten all bolts and screws. The frame includes thick foam padding on metal beams to minimize friction noise; ensure these are in place.
Bed frame feels unstable.	Incomplete or incorrect assembly; loose fasteners.	Review the assembly instructions to ensure all steps were followed correctly. Tighten all bolts and connections. Ensure the bed is on a level surface.

Specifications

Feature	Detail
Brand	Gizoon
Model Number	BF81-Y
Size	Full
Product Dimensions	75.6"L x 57.6"W x 42"H
Color	Beige

Feature	Detail
Material	Wood, Fabric (Linen), Steel
Item Weight	101.7 pounds
Maximum Weight Capacity (Bed)	800 pounds
Maximum Weight Capacity (Lifting)	100 lbs (including mattress)
