Safety Instructions

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and/or injury to persons.

- Do not immerse the appliance, power cord, or plug in water or other liquids.
- Ensure the voltage indicated on the appliance corresponds to your mains voltage.
- Do not operate the appliance with a damaged cord or plug.
- Keep the appliance out of reach of children.

- Unplug the appliance from the outlet when not in use and before cleaning.

Product Overview and Components

The De'Longhi Rivelia EXAM440.55.BG is a fully automatic bean-to-cup coffee machine designed for ease of use and versatility. Key components include:

- **8.9 cm (3.5 inch) LCD display:** For intuitive control and navigation.
- **Bean Hoppers:** Two interchangeable 250g funnels for different coffee beans.
- **13-stage steel cone grinder:** Ensures optimal grinding for various coffee types.
- **Removable brewing unit:** For easy cleaning and maintenance.
- **LatteCrema Hot System:** Automatic milk frother for perfect milk-based beverages.
- **Water Tank:** 1.4 Liters capacity.
- **Drip Tray:** Collects excess liquid.

Figure 2: Product Dimensions.

Setup

1. Unpacking and Placement

1. Remove all packaging materials.
2. Place the machine on a stable, level surface, away from heat sources and water.
3. Ensure adequate space around the machine for ventilation and access to components.

2. Initial Rinse Cycle

1. Fill the water tank with fresh cold water up to the MAX level.
2. Insert one of the 250g bean hoppers into the top of the machine.
3. Plug the machine into a grounded power outlet.
4. Follow the on-screen instructions for the initial rinse cycle. This prepares the internal circuits for use.

Figure 3: Filling the Bean Hopper.

Operating the Machine

1. Basic Coffee Preparation

1. Ensure the water tank is filled and the bean hopper contains coffee beans.
2. Place a cup under the coffee spouts.
3. Select your desired coffee recipe from the 8.9 cm LCD display. The machine offers 16 pre-programmed recipes.
4. Adjust strength, volume, and temperature as desired using the on-screen options.
5. Press the start button to begin brewing.

Figure 4: Navigating the Touch Display.

2. Milk-Based Beverages (LatteCrema Hot System)

1. Fill the milk carafe with fresh cold milk.
2. Attach the milk carafe to the machine's milk spout.
3. Place a suitable cup under the coffee and milk spouts.
4. Select a milk-based beverage (e.g., Cappuccino, Latte Macchiato) from the display.
5. The machine will automatically froth and dispense milk, followed by coffee.
6. After use, detach the milk carafe and store it in the refrigerator or clean it immediately.

Figure 5: Automatic Milk Frothing.

3. Using Pre-Ground Coffee

The machine also supports pre-ground coffee for single servings. Refer to the on-screen instructions for the specific procedure, typically involving adding one scoop of pre-ground coffee to the dedicated funnel before selecting your drink.

Maintenance

Regular cleaning and maintenance ensure optimal performance and longevity of your coffee machine. The machine features automatic rinsing and cleaning programs.

1. Daily Cleaning

- **Drip Tray and Grounds Container:** Empty and rinse daily. The machine will prompt you when full.
- **Milk Carafe:** After each use, perform the automatic cleaning cycle for the milk carafe. Disassemble and wash components with warm water and mild detergent regularly.
- **Coffee Spouts:** Wipe with a damp cloth.

2. Weekly/Bi-Weekly Cleaning

- **Brewing Unit:** Remove the brewing unit (refer to the manual for specific instructions) and rinse thoroughly under running water. Allow to air dry before reinserting.
- **Water Tank:** Rinse the water tank and check for any residue.

3. Descaling

The machine will indicate when descaling is required. Use only De'Longhi descaling solution and follow the on-screen instructions precisely. Descaling removes mineral buildup and is crucial for machine performance and lifespan.

Troubleshooting

This section addresses common issues you might encounter. For more complex problems, contact customer support.

Problem	Possible Cause	Solution
Coffee is not hot enough.	Cups are cold; temperature setting is too low.	Pre-heat cups with hot water; increase coffee temperature setting in the menu.
No coffee is dispensed.	Water tank empty; brewing unit blocked.	Fill water tank; clean brewing unit.
Milk does not froth properly.	Milk carafe dirty; milk type/temperature.	Clean milk carafe thoroughly; use cold, fresh milk (dairy or plant-based suitable for frothing).
Machine displays "Descaling required".	Mineral buildup in the system.	Perform the descaling cycle as prompted by the machine.
