## CAPHAUS SHWW-CH18362-WH CH

# CAPHAUS Wall Mounted Garage Shelving Instruction Manual

Model: SHWW-CH18362-WH CH

## INTRODUCTION

---

Thank you for choosing the CAPHAUS Wall Mounted Garage Shelving. This heavy-duty metal shelving system is designed to provide robust and versatile storage, helping you organize your garage or other spaces efficiently. This manual provides detailed instructions for safe installation, operation, and maintenance of your new shelving unit. Please read it thoroughly before beginning installation.

## SAFETY INFORMATION

---

Your safety is paramount. Please adhere to all safety guidelines to prevent injury or damage to the product and property.

- This shelving set is **not intended for metal walls**. Ensure installation is only on compatible surfaces: wood studs/joists, concrete walls, or brick walls.
- The total weight capacity for this 2-pack shelving set is **500 lbs** (250 lbs per shelf). Distribute weight evenly across the shelves. Overloading can cause structural failure and potential injury.
- Each included hook has a weight capacity of **33 lbs**. Do not exceed this limit.
- Always wear appropriate safety gear, such as safety glasses and gloves, during installation.
- Ensure the installation area is clear of electrical wires, plumbing, and other obstructions before drilling.
- If you are unsure about any step, consult a qualified professional.

## PACKAGE CONTENTS

---

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- ✓ **2 x Wire Shelves** (36 inches width x 18 inches depth each)
- ✓ **4 x Shelf Brackets**
- ✓ **4 x Versatile Hooks**

## SETUP AND INSTALLATION

Follow these steps for a cohesive and effortless installation. This design allows for one-person installation.

### 1. Choose Your Wall Type and Fasteners:

Identify your wall material. Use the **silver hex bolts** for concrete and wooden walls. Use the **golden expansion bolts** for secure installation on brick walls. Remember, this shelving is not for metal walls.

# MOUNTING DISTANCE

Provides perfect spacing of mounting

## EASY ONE-PERSON INSTALLATION

Includes Installation Template for Hole Positioning and Drilling

Bubble Level Ensures a Perfect Horizontal Alignment

Figure 2: Selecting the correct screws for your wall type.

### 2. Positioning and Drilling with Template:

Use the provided bubble level installation template to mark the precise drilling locations. The template assists with accurate hole positioning and ensures perfectly horizontal alignment. The recommended mounting distance between brackets for a single shelf is 26 inches.

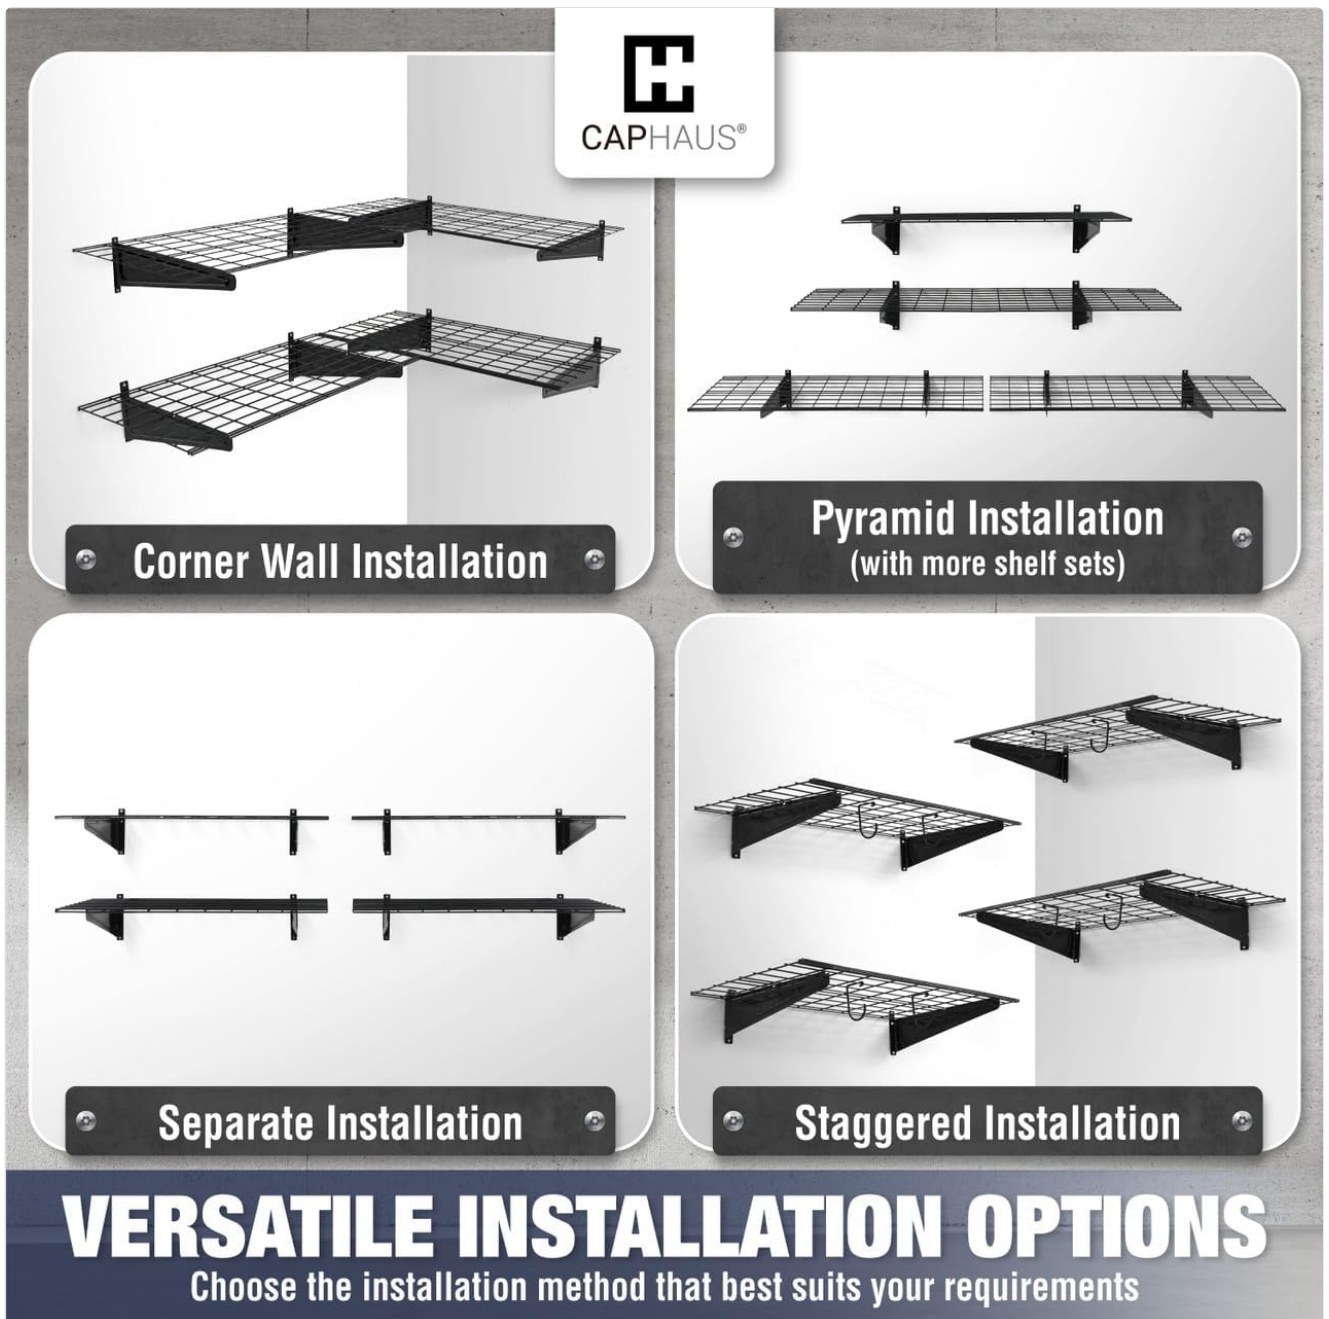

Figure 3: Using the installation template for accurate hole positioning.

**3. Install Shelf Brackets:**

Drill holes at the marked locations and securely fasten the shelf brackets to the wall using the appropriate bolts for your wall type. Ensure they are firmly attached and level.

**4. Place Wire Shelves:**

Once the brackets are secure, place the wire shelves onto the installed brackets. Ensure they sit flush and are stable.

**5. Attach Hooks:**

The versatile hooks can be attached to the wire grid of the shelves. Ensure they are installed correctly for maximum stability and to support the 33 lbs weight capacity per hook.

# SELECT THE SCREWS

For various wall types

**"Silver Hex Bolt"**  
Suitble For Concrete Wall  
& Wooden Wall

**"Golden Expansion Bolt"**  
Suitble For Brick Wall

## 6. Consider Versatile Installation Options:

The CAPHAUS shelving system offers multiple installation configurations to suit your space and needs, including corner wall, pyramid, separate, and staggered installations.

# MUTIPLE APPLICATIONS

Practical choice for a wide range of storage needs

Figure 5: Examples of versatile installation options.

## OPERATING AND USAGE

Once installed, your CAPHAUS garage shelving is ready for use. These shelves are ideal for maximizing storage in various areas.

- **Weight Distribution:** Always distribute items evenly across the shelf surface. Avoid concentrating heavy loads in one spot to prevent sagging or damage. The maximum capacity is 250 lbs per shelf, with a total of 500 lbs for the set.
- **Hook Usage:** Utilize the included hooks for hanging items such as bikes, tools, or other accessories, ensuring not to exceed the 33 lbs capacity per hook.
- **Versatile Applications:** These shelves are suitable for garages, workshops, kitchens, laundry rooms, and other areas requiring robust storage.

## MAINTENANCE

---

To ensure the longevity and appearance of your CAPHAUS shelving, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the shelves and brackets with a dry cloth to remove dust and debris. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid abrasive cleaners or harsh chemicals.
- **Regular Inspection:** Periodically check all installed bolts and connections to ensure they remain tight and secure. Retighten if necessary.
- **Load Management:** Always be mindful of the weight limits. Do not exceed 250 lbs per shelf or 33 lbs per hook.

## TROUBLESHOOTING

---

If you encounter any issues with your CAPHAUS shelving, consider the following common solutions:

- **Shelves appear wobbly or not level:**

- Ensure all mounting bolts are securely tightened.
- Verify that the wall surface is appropriate and structurally sound.
- Re-check alignment with a level during installation.

- **Difficulty installing bolts:**

- Confirm you are using the correct type of bolt for your wall material (hex bolt for wood/concrete, expansion bolt for brick).
- Ensure the drilled hole size matches the bolt requirements.

- **Hooks not holding weight:**

- Verify the hook is correctly installed onto the wire grid as shown in Figure 4.
- Ensure the weight of the item does not exceed the 33 lbs capacity per hook.

For issues not covered here, or if problems persist, please contact our customer support team.
