Dogtra CUE Gen 2

Dogtra CUE Gen 2 E-Collar User Manual

INTRODUCTION

The Dogtra CUE Gen 2 E-Collar is a remote dog training system designed for ease of use by beginners and everyday dog owners. This device assists in off-leash training by providing precise and safe control through 99 stimulation levels, a customizable Boost button, and various modes including Nick, Continuous, and Vibration (Pager). The system features an upgraded remote with larger, assignable buttons for tailored training. The receiver collar is IPX9K-rated waterproof, suitable for diverse training environments, and includes nickel-free plastic contact points for comfort on sensitive skin. It is designed for dogs 10 lbs and up.

PRODUCT COMPONENTS

The Dogtra CUE Gen 2 E-Collar package includes the following items:

- Collar (Receiver)
- Remote Transmitter
- Owner's Manual
- Plastic Contact Points
- USB-C Charging Splitter Cable

SETUP

Charging the Unit

Before initial use, fully charge the Dogtra CUE Gen 2 E-Collar. The unit requires 2 Lithium Polymer batteries (included). Use the provided USB-C Charging Splitter Cable to charge both the remote transmitter and the receiver collar simultaneously. Ensure the charging ports are clean and dry before connecting the cable. A full charge is recommended for optimal performance.

Fitting the Receiver Collar

Proper fit of the receiver collar is crucial for effective and safe operation. The lightweight, convertible receiver is designed to fit dogs 10 lbs and up, accommodating various neck shapes and sizes. Position the receiver on your dog's neck so that the plastic contact points make consistent contact with the skin. The collar should be snug enough to prevent movement but not so tight as to cause discomfort or restrict breathing. You should be able to fit two fingers comfortably between the collar strap and your dog's neck.

OPERATING INSTRUCTIONS

Remote Transmitter Functions

The Dogtra CUE Gen 2 remote features an upgraded design with larger, customizable buttons. It offers three primary correction modes:

- **Nick Mode**: Delivers a single, brief pulse of stimulation.
- **Continuous Mode**: Delivers continuous stimulation for up to 12 seconds, or until the button is released.
- **Vibration (Pager) Mode**: Provides a non-stimulating vibration.

The remote also includes a customizable **Boost button**, allowing for a quick increase in stimulation level for emergency situations. The stimulation intensity can be adjusted across 99 precise levels. The **Safety Level Lock** feature prevents accidental changes to the stimulation level during training.

MAINTENANCE

To ensure the longevity and proper function of your Dogtra CUE Gen 2 E-Collar, follow these maintenance guidelines:

- **Cleaning**: After exposure to dirt or water, clean the receiver collar and remote transmitter.
- **Saltwater Exposure**: If exposed to saltwater, rinse the unit thoroughly with fresh water immediately.
- **Storage**: Store the device in a cool, dry place when not in use.
- **Charging**: Always ensure the charging ports are dry before connecting the USB-C cable.

TROUBLESHOOTING

If you encounter issues with your Dogtra CUE Gen 2 E-Collar, consider the following:

- **No Power/Not Charging**: Ensure the USB-C charging cable is properly connected to both the unit and a power source. Verify the charging ports are clean and dry.
- **Inconsistent Stimulation**: Check the fit of the receiver collar. The contact points must make consistent contact with the dog's skin. Trim your dog's fur if it is too thick and interferes with contact.
- **Remote Not Responding**: Ensure both the remote and receiver are charged and powered on. Repair the units if necessary (refer to the full owner's manual for pairing instructions).

SPECIFICATIONS

Feature	Detail
Item Weight	13.7 ounces
Item Model Number	644622020994

Batteries	2 Lithium Polymer batteries (included)
