Tonnlog V36

Tonnlog V36 Digital Voice Recorder User Manual

Model: V36 | 128GB, 1536kbps, USB-C with Noise Reduction

1. Introduction

Thank you for choosing the Tonnlog V36 Digital Voice Recorder. This device is designed for high-quality audio recording with advanced features such as 1536kbps recording, noise reduction, and a large 128GB storage capacity. This manual provides essential information for setting up, operating, and maintaining your device to ensure optimal performance.

Package Contents:

- 1 x Tonnlog V36 Digital Voice Recorder
- 1 x USB-C Data Cable
- 1 x Headphones
- 1 x Transcription Line
- 1 x Lanyard
- 1 x User Manual (this document)

2. Safety Information and Important Reminders

- **Charge Before Use:** Ensure the device is fully charged before its first use to maximize battery life and performance.
- **Memory Card Formatting:** Before using the recorder for the first time, or after inserting a new memory card, format the card directly within the recorder's menu. **Do not format the memory card on your computer**, as this may cause functionality issues.
- **TF Card Priority:** To utilize the full 128GB storage, ensure you set the recording priority to save files on the TF card within the device settings.
- **Memory Card Usage:** It is recommended to use the original memory card provided. Avoid frequently replacing the memory card to prevent potential data corruption or device issues.

3. Product Overview

The Tonnlog V36 is a compact and durable digital voice recorder, crafted from a lightweight zinc alloy. Its intuitive design

features a clear LCD screen and easily accessible control buttons.

4. Setup

4.1 Charging the Device

The recorder is equipped with an 800 mAh lithium-polymer battery. To charge:

1. Connect the provided USB-C data cable to the recorder's USB-C port.
2. Connect the other end of the cable to a USB power adapter (not included) or a computer's USB port.
3. A full charge typically takes approximately 2 hours. The device supports recording while charging.

The recorder will automatically save files if the battery runs low during recording.

4.2 Memory Card Preparation

The Tonnlog V36 comes with a 128GB TF memory card. Proper formatting is crucial for correct operation:

1. Insert the TF card into the designated slot on the recorder.
2. Power on the device.
3. Navigate through the device menu to find the 'Format' option.
4. Select 'Format' and confirm to format the memory card. This process prepares the card for recording and ensures compatibility.
5. Ensure the TF card is formatted to FAT32. The recorder supports TF cards from 8GB to 128GB.

Important: Always format the memory card using the recorder's menu, not on a computer, to prevent operational issues.

4.3 Connecting to a Computer for File Transfer

To transfer recorded files to your computer:

1. Connect the recorder to your computer using the USB-C data cable.
2. The recorder will appear as a removable disk drive on your computer (compatible with Windows/Mac PC).
3. You can then drag and drop files to and from the recorder.

5. Operating Instructions

5.1 One-Touch Recording

The Tonnlog V36 features a simple one-button operation for recording:

- To start recording, slide the 'REC' button (usually marked with a red dot) upwards. The device will begin recording immediately.
- To stop and save the recording, slide the 'STOP' button downwards.
- Recordings are automatically named by date and time for easy organization.

5.2 Playback

You can play back recordings through the built-in dual speakers or via headphones:

- **Using Dual Speakers:** Navigate to your saved recordings and select the file you wish to play. The audio will play through the device's external speakers. Volume can be adjusted from 0 to 30.
- **Using Headphones:** Insert the provided wired headphones into the 3.5mm jack on the right side of the recorder. This jack is specifically for headphone playback.

5.3 Line-In Recording

The recorder supports line-in recording from external audio sources:

- Connect the transcription cable (included in the package) to the 3.5mm jack on the left side of the recorder.
- Connect the other end of the transcription cable to the audio output of an MP3 player, smartphone, or computer.
- Start recording on the Tonnlog V36 to capture audio directly from the connected device.

5.4 Multifunction Features

The Tonnlog V36 offers several advanced features to enhance your recording experience:

- **One-Click Lock:** Prevents accidental button presses during recording or playback.
- **A-B Repeat:** Allows you to loop a specific section of an audio file for detailed review.
- **Password Protection:** Secure your recordings with a password to protect sensitive information.
- **Voice Activation:** The recorder starts recording automatically when sound is detected and pauses when silence occurs, saving memory space.
- **Timer Recording:** Schedule recordings to start and stop at specific times.
- **Noise Reduction:** Built-in technology to minimize background noise for clearer recordings.

Image: The Tonnlog V36 Digital Voice Recorder displayed with icons representing its multi-function capabilities, including voice activation, recording monitoring, password protection, variable speed playback, one-key lock, dual speakers, timer recording, and A-B repeat.

6. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the device. Avoid using liquid cleaners or solvents.

- **Storage:** Store the recorder in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Battery Care:** For long-term storage, charge the battery to about 50% every few months to maintain its health.
- **Avoid Drops:** While durable, avoid dropping the device to prevent internal damage.

7. Troubleshooting

Common Issues and Solutions:

- **Device not turning on:**
  - Ensure the battery is charged. Connect to a power source and try again.
- **Cannot record or save files:**
  - Check if the memory card is properly inserted.
  - Ensure the memory card has been formatted within the device (see Section 4.2).
  - Verify that there is sufficient storage space on the memory card.
  - Check if the 'One-Click Lock' feature is activated, preventing recording.
- **Poor audio quality:**
  - Ensure the microphone is not obstructed.
  - Check recording settings (e.g., bit rate). Higher bit rates (like 1536kbps) offer better quality.
  - Reduce background noise in the recording environment.
- **Device not recognized by computer:**
  - Ensure the USB-C cable is securely connected to both the recorder and the computer.
  - Try a different USB port or cable.
  - Restart both the recorder and the computer.

8. Specifications

Brand	Tonnlog
Model Number	V36
Product Dimensions	97 x 32 x 13 mm
Item Weight	68 Grams
Screen Size	1.4 Inches (128 x 64 LCD)
Memory Storage Capacity	128 GB (TF card included)
Battery Type	800 mAh Lithium-Polymer (Rechargeable)
Charging Time	Approx. 2 hours
Recording Quality	Up to 1536 kbps

Audio Formats	MP3, WAV
Connectivity	USB Type-C
Headphone Jack	3.5 mm
Microphone Technology	Stereo, Integrated
Special Features	HD Recording, USB Port, Voice Recognition, Noise Reduction, One-Click Lock, A-B Repeat, Password Protection, Timer Recording

9. Warranty and Support

Tonnlog provides a **1-year warranty** for the V36 Digital Voice Recorder, covering manufacturing defects and malfunctions under normal use.

Additionally, Tonnlog offers **lifetime customer support**. If you encounter any issues, have questions, or require assistance with your device, please do not hesitate to contact our customer service team. Refer to the contact information provided in your product packaging or on the official Tonnlog website.
