- **Monitor Height:** Adjust your monitor(s) so the top of the screen is at or slightly below eye level. The monitor stand helps achieve this.
- **Keyboard Position:** Keep your keyboard and mouse close to your body on the slider, allowing your elbows to remain at a 90-degree angle.
- **Chair Adjustment:** Use an adjustable office chair to support your back and ensure your feet are flat on the floor or a footrest.

- **Spills:** Immediately wipe up any spills to prevent staining or damage to the wood surface.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary, but do not overtighten.
- **Drawer Care:** The fabric drawers can be spot cleaned with a mild detergent if needed. Ensure they are completely dry before placing items back inside.
- **Avoid Excessive Weight:** Do not place excessively heavy items on the keyboard slider or drawers to prevent damage or deformation.

## 7. TROUBLESHOOTING

If you encounter any issues with your ODK computer desk, please refer to the following common troubleshooting tips:

### 7.1. Desk is Wobbly

- **Check Leveling Feet:** Ensure all adjustable feet at the bottom of the desk legs are properly adjusted to compensate for uneven flooring.
- **Tighten Screws:** Verify that all assembly screws are securely tightened. Loose connections can cause instability.

- **Clean Rails:** Dust or debris in the rails can impede movement. Clean the rails with a dry cloth.
- **Lubrication:** If necessary, apply a small amount of silicone-based lubricant to the slider mechanisms.

### 7.3. Drawers Not Fitting Properly

- **Reassemble Drawers:** Ensure the fabric drawers are assembled correctly and their bases are fully inserted.
- **Check Desk Frame:** Verify that the desk frame itself is assembled squarely and not warped, which could affect drawer fit.
