Goldair 1.7 Litre Glass Kettle GGK-2000 User Manual

INTRODUCTION

This manual provides essential instructions for the safe and efficient operation, maintenance, and troubleshooting of your Goldair 1.7 Litre Glass Kettle, model GGK-2000. Please read these instructions carefully before first use and retain them for future reference.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- Read all instructions before using the kettle.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against fire, electric shock, and injury to persons, do not immerse cord, plugs, or the kettle in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may result in fire, electric shock, or personal injury.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off", then remove plug from wall outlet.

- Do not use appliance for other than intended use.
- The kettle must be used only with the stand provided.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

PRODUCT OVERVIEW

The Goldair GGK-2000 is a 1.7 litre glass kettle designed for efficient water boiling. It features a full glass body, a 360-degree rotational base, and safety functions like auto shut-off and boil-dry protection.

Image 1: The Goldair GGK-2000 glass kettle, showing its transparent body, handle, lid, and water level indicators (MIN 0.5L, 1.0L, 1.5L, MAX 1.7L). The base is silver-colored stainless steel.

Components:

- Glass Kettle Body (1.7 Litre capacity)
- Lid with release button
- Handle
- Power Switch (On/Off)
- Water Level Indicator (visible through glass body)
- Removable Filter (located inside spout)
- 360-degree Rotational Power Base with cord storage
- Concealed Heating Element

SETUP AND FIRST USE

1. **Unpacking:** Carefully remove the kettle and all accessories from the packaging. Retain packaging for future storage or disposal.
2. **Initial Cleaning:** Before first use, fill the kettle with clean water to the MAX level. Boil the water, then discard it. Repeat this process 2-3 times to remove any manufacturing residues.
3. **Placement:** Place the power base on a flat, stable, heat-resistant surface, away from the edge of the counter. Ensure the power cord is not dangling or in contact with hot surfaces.
4. **Power Connection:** Plug the power cord into a grounded electrical outlet.

OPERATING INSTRUCTIONS

1. **Filling the Kettle:**
 - Press the lid release button to open the lid.
 - Fill the kettle with the desired amount of fresh water. Do not fill below the MIN (0.5L) mark or above the MAX (1.7L) mark. Overfilling may cause boiling water to spill out.
 - Close the lid firmly until it clicks into place.
2. **Placing on Base:** Place the kettle securely onto the power base. The 360-degree rotational base allows for easy placement from any angle.
3. **Boiling Water:**
 - Ensure the kettle is properly seated on the base and plugged into a power outlet.
 - Press the power switch down to the "I" (ON) position. The indicator light will illuminate, indicating the kettle is heating.
 - The kettle will automatically switch off and the indicator light will extinguish once the water has boiled.
4. **Pouring Water:** Carefully lift the kettle from its base and pour the hot water. Always pour slowly and steadily to avoid splashing.
5. **Re-boiling:** If the kettle has just boiled, allow a few moments for the internal thermostat to reset before attempting to re-boil.

MAINTENANCE AND CLEANING

Regular cleaning and maintenance will ensure the longevity and optimal performance of your kettle.

1. **Before Cleaning:** Always unplug the kettle from the power outlet and allow it to cool completely before cleaning.
2. **Exterior Cleaning:** Wipe the exterior of the kettle and the power base with a soft, damp cloth. Do not use abrasive cleaners or scouring pads. Never immerse the kettle or its base in water or any other liquid.
3. **Interior Cleaning (Descaling):** Over time, mineral deposits (limescale) may build up inside the kettle, especially in hard water areas.
 - Fill the kettle with a mixture of one part white vinegar and two parts water.
 - Boil the mixture and let it stand for at least 30 minutes, or longer for heavy scale.
 - Empty the kettle and rinse thoroughly with fresh water several times.
 - For stubborn deposits, a commercial descaling agent designed for kettles can be used following the product's instructions.
4. **Filter Cleaning:** The removable filter in the spout can be gently rinsed under running water. If heavily scaled, it can be soaked in the vinegar solution used for descaling the kettle. Ensure it is properly re-inserted after cleaning.

Image 2: A close-up view of the Goldair GGK-2000 glass kettle, highlighting its clear glass body and the stainless steel base. This image also shows the LED illumination feature when the kettle is in operation.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Kettle does not heat up.	Not plugged in. Power switch not pressed. Kettle not properly seated on base. No power at outlet. Boil-dry protection activated.	Ensure plug is firmly in outlet. Press the power switch to the "ON" position. Ensure kettle is correctly placed on the power base. Check household circuit breaker or try another outlet. Allow kettle to cool down for 15-20 minutes, then refill and restart.
Kettle switches off before boiling.	Excessive limescale build-up. Lid not closed properly.	Descale the kettle as per "Maintenance and Cleaning" section. Ensure the lid is firmly closed.

Problem	Possible Cause	Solution
Water tastes metallic or unusual.	New appliance residue. Limescale build-up.	Perform initial cleaning steps (boil and discard water several times). Descale the kettle.
Steam escapes from lid during boiling.	Lid not sealed properly.	Ensure the lid is closed firmly until it clicks. If the issue persists, contact customer support.

SPECIFICATIONS

- **Model:** GGK-2000
- **Brand:** Goldair
- **Capacity:** 1.7 Litres
- **Material:** Glass, Stainless Steel
- **Colour:** Silver
- **Wattage:** 2000 Watts
- **Voltage:** 230 Volts
- **Special Features:** Boil Dry Protection, Cordless, Hinged Lid, Water Level Indicator, Concealed Heating Element, 360-degree Rotational Base
- **Product Dimensions (L x W x H):** 12L x 12W x 22H centimetres
- **Item Weight:** 1 Kilogram
