4. OPERATING INSTRUCTIONS

Familiarize yourself with the chair's adjustable features for optimal comfort and support.

Seat Height Adjustment:

To adjust the seat height, pull the lever located under the right side of the seat upwards. While holding the lever, apply your weight to lower the seat or lift your weight to raise it. Release the lever at your desired height to lock it in place.

Tilt Function & Lock:

The chair features a 135° tilt angle. To engage the rocking function, pull the same lever (used for height adjustment) outwards. To lock the chair in an upright position, push the lever inwards. The tension of the rocking motion can be adjusted by turning the round tension knob located under the front of the seat.

Flip-Up Armrests:

The padded armrests can be flipped up to allow the chair to be stored closer to or under a desk, saving space. Simply lift the armrests upwards until they lock into their vertical position. To return them to the down position, gently pull them downwards.

5. MAINTENANCE & CARE

To maintain the appearance, functionality, and longevity of your OLIXIS chair, follow these care instructions:

Cleaning:

- Spot clean the PU leather with a damp cloth and a mild, non-abrasive soap solution.

- Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the material.
- Wipe any spills immediately with a clean, dry cloth.
- For deeper cleaning, consult a professional upholstery cleaner.

General Maintenance:

- Periodically check all screws and bolts to ensure they are tight. Re-tighten if necessary to prevent wobbling or instability.
- Inspect casters regularly for accumulated hair or debris and clean them to ensure smooth rolling.
- If any moving parts (e.g., gas lift, tilt mechanism) begin to squeak or operate roughly, apply a small amount of silicone-based lubricant.
- Avoid exposing the chair to direct sunlight or extreme temperatures, which can cause the PU leather to fade or crack.

6. TROUBLESHOOTING

If you encounter any issues with your OLIXIS office chair, refer to the following common problems and solutions:

- **Chair Sinks or Does Not Adjust Height:** Ensure the gas lift lever is fully engaged. If the issue persists, the gas lift cylinder may be faulty and require replacement. Contact customer support.
- **Chair Wobbles or Feels Unstable:** Check all assembly screws and bolts, especially those connecting the seat to the mechanism and the armrests to the backrest. Tighten any loose connections. Ensure the chair is on a flat, even surface.
- **Casters Do Not Roll Smoothly:** Inspect the casters for accumulated debris such as hair, dust, or carpet fibers. Clean them thoroughly. If they remain stiff, a small amount of lubricant can be applied.
- **Squeaking Noises:** Identify the source of the squeak (e.g., gas lift, tilt mechanism, connections between parts). Apply a silicone-based lubricant to the moving parts or connection points.
- **Armrests Do Not Flip Up/Down Smoothly:** Check for any obstructions or debris in the hinge mechanism. Apply a small amount of lubricant if needed.

If these troubleshooting steps do not resolve the issue, please contact OLIXIS customer service for further assistance.
