## TROUBLESHOOTING

---

If you encounter issues with your nightstand, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Nightstand is wobbly.	Loose fasteners; uneven floor.	Check and tighten all assembly screws. Ensure the nightstand is on a level surface. Adjust protective pads if necessary.
Drawers do not close smoothly or get stuck.	Overloaded drawer; incorrect slide installation; obstruction.	Reduce the weight in the drawer. Verify drawer slides were installed correctly during assembly. Check for any items obstructing the drawer path.
Charging station is not working.	Power cord not plugged in; wall outlet issue; device incompatibility.	Ensure the nightstand's power cord is securely plugged into a functional wall outlet. Test the wall outlet with another device. Verify your device is compatible with 5V/2A USB or 125V/12A AC.
Decorative bar between drawers is loose.	Wood pegs may not hold securely.	If the decorative bar becomes loose, a small amount of wood glue can be applied to secure it in place.
