## 6. MAINTENANCE

---

To ensure the longevity and hygiene of your Feandrea Cat Tree, follow these simple maintenance guidelines:

- **Cleaning:** Wipe surfaces with a damp cloth to remove dust and pet hair. For deeper cleaning, a handheld vacuum cleaner can be used on the plush surfaces. Avoid harsh chemicals or abrasive cleaners.
- **Sisal Posts:** The sisal scratching posts are designed to withstand regular scratching. If they become heavily frayed, they may need to be replaced to maintain their effectiveness.
- **Loose Parts:** Periodically check all screws and connections. Tighten any that have become loose due to your cat's activity.
- **Odor Control:** If odors develop, sprinkle baking soda on the plush areas, let it sit for 15-30 minutes, then vacuum thoroughly.

## 7. TROUBLESHOOTING

### **Issue: Missing parts during unboxing.**

**Solution:** Some smaller components may be securely tucked into the padded areas of larger parts for protection during shipping. Please thoroughly check all plush-covered sections, especially inside caves or under platforms, before concluding parts are missing. If still missing, contact customer support.

### **Issue: Cat tree feels wobbly or unstable after assembly.**

**Solution:** Ensure all screws are tightened firmly. Re-check each connection point and use the provided Allen key to tighten any loose screws. If the issue persists, ensure the cat tree is placed on a completely flat and level surface. For maximum stability, use the included wall anchor to secure the tree to a wall.

### **Issue: Cats are not using the scratching posts.**

**Solution:** Encourage your cats by gently rubbing catnip on the sisal posts. You can also demonstrate scratching by gently guiding their paws or making scratching motions yourself. Ensure the posts are stable and tall enough for your cat to stretch fully while scratching.
