## OPERATING INSTRUCTIONS

## 1. Priming the Blaster

Once darts are loaded into the barrels, grasp the priming slide located on the top of the blaster. Pull the priming slide backward completely, then push it forward completely until it clicks into place. This action primes the blaster for firing.

## 2. Firing Darts

After priming, aim the blaster at your target (ensuring no eyes or faces are in the line of fire). Pull the trigger to launch one dart. To fire subsequent darts, you must prime the blaster again for each shot.

## 3. Onboard Dart Storage

The blaster features onboard storage for 5 additional darts. These can be stored in the designated slots on the side of the blaster, allowing for quick and convenient reloads during play.

## 4. Customization (Upgrade-Ready)

The Ranger PD-5 blaster is equipped with a tactical rail and a stock attachment point. These features allow for customization with compatible Nerf Elite 2.0 accessories (sold separately) to enhance your game strategy and tactical performance.

# MAINTENANCE

## 1. Cleaning

To clean your blaster, wipe it with a soft, dry cloth. Do not use water or cleaning solutions, as this may damage the internal mechanisms. Ensure darts are clean and free of debris before loading to prevent jamming.

## 2. Storage

Store the blaster and darts in a cool, dry place away from direct sunlight and extreme temperatures. Keep darts organized to prevent damage or loss.
