VTRIN XJ-112

VTRIN 10-Tier Shoe Rack Instruction Manual

Model: XJ-112

PRODUCT OVERVIEW

The VTRIN 10-Tier Shoe Rack is a large-capacity organizer designed to efficiently store up to 50 pairs of adult shoes. Its sturdy metal frame, reinforced plastic connectors, and waterproof non-woven fabric layers ensure stability and durability. This versatile storage solution is suitable for various items beyond shoes, including bags, sundries, books, and plants. It features 10 integrated hooks for hanging keys, umbrellas, or other small accessories, and anti-fall handrails on the top for secure item placement.

PACKAGE CONTENTS

Before assembly, please verify that all components listed below are present in your package:

- Metal Poles (various lengths)
- Reinforced Plastic Connectors
- Waterproof Non-woven Fabric Layers (10 pieces)
- Hooks (10 pieces)
- Small Wooden Hammer (for assembly)
- Instruction Manual

Image: Detailed diagram illustrating all components included in the package and step-by-step assembly instructions.

ASSEMBLY INSTRUCTIONS

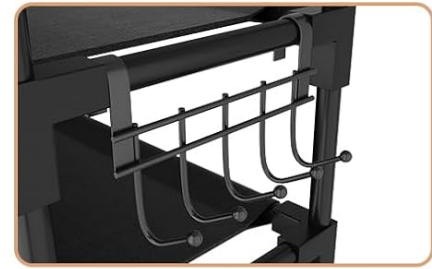

Follow these steps carefully to assemble your VTRIN 10-Tier Shoe Rack. A small wooden hammer is provided to ensure secure connections.

- 1. Prepare Components:** Lay out all metal poles, plastic connectors, and fabric layers. Identify the different lengths of poles (e.g., 16.9", 9.8", 6.7").
- 2. Assemble Base Layer:** Connect the longest steel pipes (labeled ① and ② in diagrams) using plastic connectors (labeled ⑤) to form the frame for one shelf. Ensure the connector holes face upwards.
- 3. Attach Fabric Layer:** Slide one non-woven fabric layer (labeled ⑥) onto the assembled frame, ensuring it is taut and securely fitted over the poles.
- 4. Add Vertical Supports:** Insert the shorter vertical poles (labeled ④) into the upward-facing holes of the plastic connectors. Use the provided wooden hammer to gently tap the connections for a secure fit.
- 5. Build Upwards:** Repeat steps 2-4 for each subsequent tier. Connect the next set of horizontal poles and fabric layers, then add the next set of vertical supports.
- 6. Install Anti-Drop Handles:** Once all 10 tiers are assembled, install the anti-drop handles (composed of parts ③ and ⑧) at the top of the rack.
- 7. Attach Hooks:** Secure the 10 hooks (labeled ⑦) to the designated areas on both sides of the top section of the rack.

OPERATING INSTRUCTIONS

The VTRIN 10-Tier Shoe Rack is designed for straightforward use and maximum storage efficiency.

- **Shoe Placement:** Place shoes directly onto the non-woven fabric layers. Each tier can accommodate multiple pairs depending on shoe size and style.
- **Boot Storage:** For taller boots, one or more fabric layers can be removed to create taller compartments.
- **Accessory Hooks:** Utilize the 10 side hooks to hang small items such as keys, umbrellas, bags, or scarves.
- **Top Shelf Usage:** The top shelf with anti-fall handrails provides a secure area for placing larger items or decorative elements.

MAINTENANCE

To ensure the longevity and cleanliness of your shoe rack, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the non-woven fabric layers and metal poles with a dry cloth to remove dust and dirt. The waterproof material makes cleaning easy.
- **Stability Check:** Periodically check all connections to ensure they remain tight. If any looseness is detected, gently tap the plastic connectors with the wooden hammer to re-secure.
- **Avoid Overloading:** Do not exceed the maximum weight limit of 60 pounds to maintain the rack's structural integrity.

TROUBLESHOOTING

Here are answers to some common questions regarding the VTRIN 10-Tier Shoe Rack:

- **Q: How do I know if the shoe rack is the right size for my space?**

A: The dimensions of the shoe rack are 34"L x 10"W x 68"H. Please measure your intended space to ensure proper fit. Product images also provide visual size references.

- **Q: How do I place my high heels?**

A: High heels can be placed securely on the provided PP plastic sheets, which offer a flat and stable surface.

- **Q: The rack feels wobbly after assembly. What should I do?**

A: Ensure all metal poles are fully inserted into the plastic connectors. Use the included small wooden hammer to gently tap each joint until it is firm and secure. This will enhance the rack's stability.
