Magichome M-S-RL

Magichome Filtered Shower Head with 2m Hose (Model M-S-RL)

Instruction Manual

INTRODUCTION

This manual provides instructions for the Magichome Filtered Shower Head with 2m Hose (Model M-S-RL). This product features an 18-stage filtration system, 6 spray modes, and is designed for high-pressure water flow, aiming to improve water quality and your showering experience. Please read these instructions carefully before installation and use.

SETUP AND INSTALLATION

Before installation, ensure all components are present: the shower head, the 2-meter hose, and a replacement filter cartridge. No special tools are required for installation.

Installation Steps:

1. **Step 1:** Remove your existing shower head and hose from the shower arm outlet.
2. **Step 2:** Connect the new 2-meter shower hose to your shower arm outlet. Ensure the rubber washer is correctly seated inside the hose connector to prevent leaks. Hand-tighten only.
3. **Step 3:** Attach the Magichome filtered shower head to the other end of the 2-meter hose. Ensure the rubber washer is in place and hand-tighten.
4. **Step 4:** Turn on the water supply and check for leaks at all connections. If leaks occur, tighten slightly more or re-seat the washers.

Easy Installation without Tools

The image illustrates the simple, tool-free installation process: 1) connecting the hose to the shower head, 2) attaching the hose to the water outlet, and 3) the fully installed shower system.

OPERATING INSTRUCTIONS

The Magichome shower head offers 6 distinct spray modes, allowing you to customize your shower experience. A convenient one-hand switch on the shower head allows for easy mode selection.

Changing Spray Modes:

To change modes, rotate the selector on the shower head to cycle through the available spray patterns.

6 Modes for Different Uses

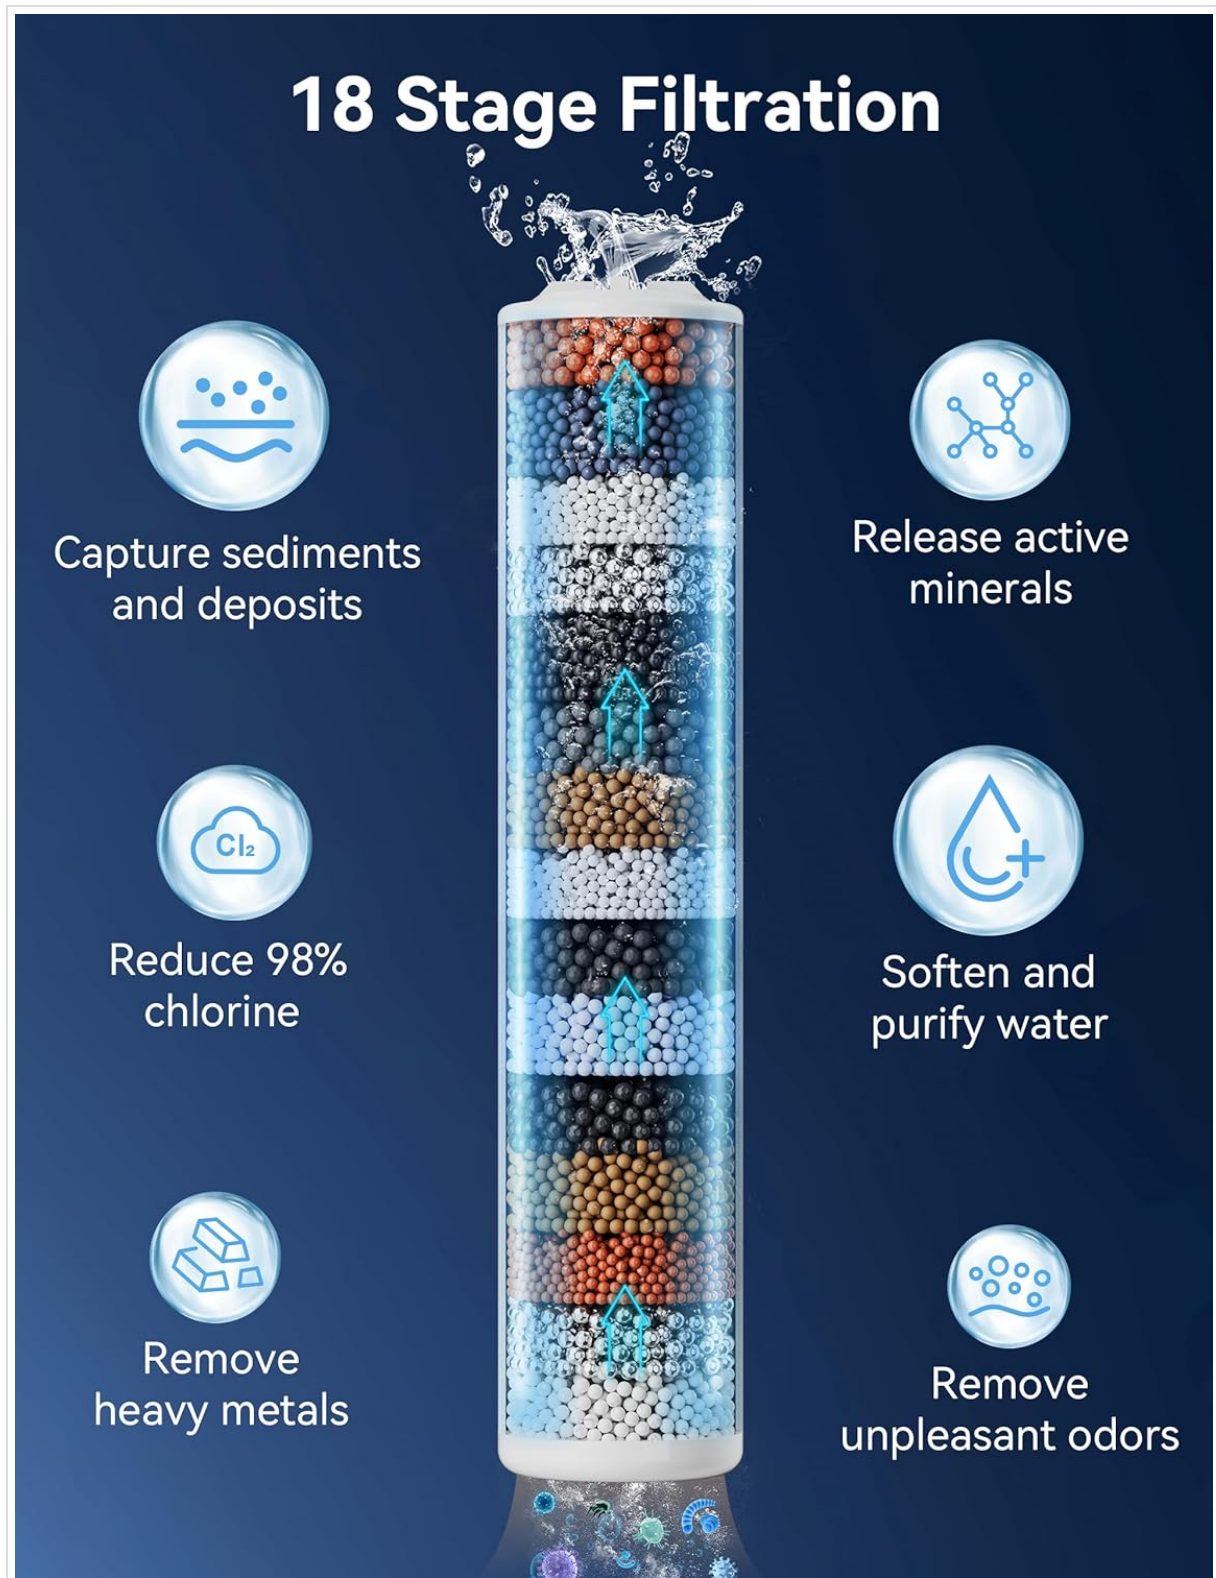

This image displays six distinct spray patterns, demonstrating the variety of modes available for different showering preferences, from gentle rain to powerful massage.

Water Filtration:

The integrated 18-stage filtration system continuously purifies water as it passes through the shower head. This system is designed to reduce impurities, heavy metals, chlorine, and sediments, while also softening the water and releasing active minerals.

18 Stage Filtration

This diagram illustrates the multi-layered 18-stage filtration process, detailing how various media remove impurities, heavy metals, chlorine, and sediments from the water, while also softening it and releasing active minerals.

High Pressure Design:

The shower head is engineered to provide a strong, consistent water flow, which can be beneficial in areas with lower water pressure.

High Pressure Shower Head

An image comparing the strong, consistent water flow of the Magichome shower head (left) against a typical shower head (right), demonstrating the enhanced water pressure.

MAINTENANCE

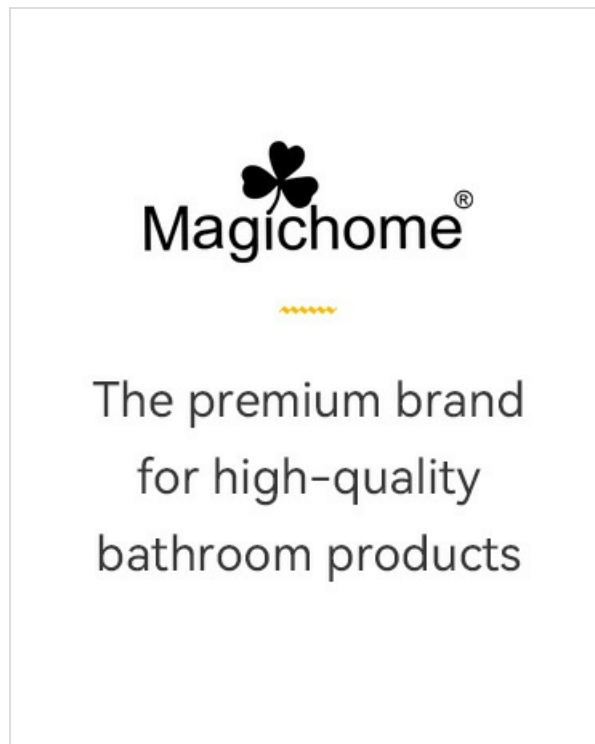

Regular maintenance ensures optimal performance and longevity of your Magichome filtered shower head.

Filter Cartridge Replacement:

The filter beads should be replaced approximately every **3 months**, depending on local water quality and usage frequency. To replace the cartridge:

1. Unscrew the shower head handle from the main body.

2. Carefully remove the old filter cartridge.
3. Insert the new filter cartridge, ensuring it is properly seated.
4. Screw the shower head handle back onto the main body until secure.

This image shows the various granular components within the filter cartridge, which contribute to the multi-stage water purification process.

Nozzle Cleaning:

The shower head features anti-clogging silicone nozzles. To clean, gently rub the nozzles with your finger or a soft brush to dislodge any mineral deposits. This helps maintain consistent water flow and prevents blockages.

Anti-clogging Silicone Nozzles

A detailed view of the shower head's face, showing the flexible silicone nozzles designed to resist limescale buildup and ensure an even spray.

TROUBLESHOOTING

If you encounter issues with your shower head, refer to the following common problems and solutions.

- **Low Water Pressure:**

- Check if the filter cartridge is clogged. Replace if necessary (refer to Maintenance section).
- Ensure the hose is not kinked or obstructed.
- Clean the silicone nozzles for any mineral buildup (refer to Maintenance section).

- **Reduced Filtration Effectiveness:**

- The filter cartridge may need replacement. Refer to the Maintenance section for replacement frequency.

- **Leaks from Connections:**

- Ensure all connections are hand-tightened. Do not overtighten.
- Verify that rubber washers are correctly seated at each connection point. Replace if damaged.

SPECIFICATIONS

Key technical specifications for the Magichome Filtered Shower Head (Model M-S-RL).

Brand	Magichome
Model Number	M-S-RL
ASIN	B0CKYFGDH5
Dimensions (L x W x H)	25 x 15 x 12.7 cm (9.8 x 5.9 x 5 inches)
Weight	300 grams (0.66 lbs)
Material	Ceramic Acrylonitrile Butadiene Styrene (ABS)
Finish	Chrome Plated
Shape	Round
Installation Method	Wall Mount
Number of Modes	6
Hose Length	2 meters (6.56 feet)
Special Features	6-mode shower head, 18-level filter, high-pressure design
Included Components	Shower head, 2m shower hose, replacement filter cartridge

WARRANTY INFORMATION

Magichome products are subject to specific warranty terms. Please refer to the warranty information provided with your purchase documentation or contact your retailer for details regarding coverage and duration.

CUSTOMER SUPPORT

For any questions, technical assistance, or support not covered in this manual, please contact Magichome customer service. Contact information can typically be found on the product packaging, the official Magichome website, or through your original point of purchase.
