KAKO 0.065 Inch Round Trimmer Line (2000ft, 3LB)

KAKO 0.065 Inch Round Trimmer Line Instruction Manual

Model: 0.065 Inch Round Trimmer Line (2000ft, 3LB)

1. INTRODUCTION

This manual provides essential information for the proper use and maintenance of your KAKO 0.065 inch round trimmer line. Please read these instructions carefully before use to ensure optimal performance and safety.

The KAKO 0.065 inch round trimmer line is a commercial-grade, high-quality nylon line designed for durability and efficient cutting. Its round shape is suitable for general trimming tasks, offering less resistance and vibration compared to other line shapes. This line is compatible with a wide range of string trimmer brands, including Echo, Husqvarna, Redmax, Ryobi, Black & Decker, Cub Cadet, and Weed Eater.

2. SETUP AND INSTALLATION

This bulk trimmer line requires manual winding onto your string trimmer's spool. Always refer to your specific string trimmer's instruction manual for detailed spool loading procedures.

General Installation Steps:

1. **Safety First:** Ensure your string trimmer is turned off and disconnected from its power source (unplugged for electric, battery removed for cordless, spark plug wire disconnected for gas models) before handling the trimmer head.
2. **Remove Old Line:** If present, remove any remaining old trimmer line from the spool.
3. **Measure and Cut:** Unwind the desired length of KAKO 0.065 inch trimmer line from the bulk spool. The required length varies by trimmer model; consult your trimmer's manual. Typically, 15-20 feet per

line is common.

4. **Wind the Spool:** Carefully wind the new line onto your trimmer's spool, following the directional arrows or instructions provided by your trimmer manufacturer. Ensure the line is wound tightly and evenly to prevent tangles and feeding issues.
5. **Reassemble Trimmer Head:** Once the line is properly wound, reassemble the trimmer head components according to your trimmer's manual.

3. OPERATING INSTRUCTIONS

Once the KAKO 0.065 inch round trimmer line is correctly installed, operate your string trimmer according to its manufacturer's guidelines. This line is designed for efficient weeding and cutting through heavier weeds and thicker grass quickly.

Tips for Effective Trimming:

- **Maintain Proper RPM:** Operate your trimmer at the recommended RPM for optimal cutting performance and to prevent premature line breakage.
- **Angle of Attack:** Use a slight angle when trimming to cut through vegetation effectively without excessive line wear.

- **Avoid Hard Surfaces:** Minimize contact with concrete, rocks, fences, and other hard surfaces to prolong line life.
- **Feed Line as Needed:** Most trimmers have an automatic or bump-feed mechanism to advance the line. Ensure you understand how to feed new line when it wears down.

4. MAINTENANCE AND STORAGE

Proper care and storage of your KAKO trimmer line will ensure its longevity and performance.

Storage Recommendations:

- **Keep Dry:** Store the bulk spool of trimmer line in a cool, dry place away from direct sunlight and extreme temperatures.
- **Prevent Kinks:** Avoid bending or kinking the line excessively during storage, as this can weaken it.
- **Original Packaging:** Keep the line on its original spool to maintain its shape and prevent tangles.

5. TROUBLESHOOTING

Here are some common issues and solutions related to trimmer line performance:

Line Not Feeding:

- **Check Winding:** Ensure the line is wound tightly and evenly on the spool, without any overlaps or tangles.
- **Spool Damage:** Inspect the spool for any damage or debris that might be obstructing the line feed mechanism.
- **Trimmer Head Issue:** Refer to your trimmer's manual for troubleshooting its specific line feeding mechanism.

Line Breaking Too Frequently:

- **Cutting Technique:** Avoid hitting hard surfaces. Use a sweeping motion and cut with the tip of the line.
- **Line Length:** Ensure the line is not excessively long for your trimmer, which can put undue stress on it.
- **Storage Conditions:** Improper storage (e.g., exposure to heat or sunlight) can degrade nylon line. Ensure it's stored in a cool, dry place.

6. SPECIFICATIONS

Diameter	0.065 inch (1.65 mm)
Length	2000 feet
Weight	3 lbs (approx. 3.45 lbs with packaging)
Shape	Round-shaped
Color	Orange
Material	High-quality Nylon
Compatibility	Fits most string trimmers (e.g., Echo, Husqvarna, Redmax, Ryobi, Black & Decker, Cub Cadet, Weed Eater)
Package Dimensions	7.4 x 7.28 x 6.85 inches
