6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Blender does not turn on.	Not plugged in; power outlet not working; motor unit not properly assembled with attachment.	Ensure the blender is securely plugged into a working outlet. Check that the attachment is correctly locked into the motor unit.
Poor blending results.	Too much food; food pieces too large; insufficient liquid; incorrect speed setting.	Reduce the amount of food. Cut food into smaller pieces. Add more liquid if necessary. Increase speed or use the Turbo function.
Appliance stops during operation.	Overheating due to continuous use or overloading.	Unplug the appliance and let it cool down for at least 10-15 minutes. Reduce the load and avoid continuous operation for extended periods.
