4. MAINTENANCE

Proper care will extend the life of your Zinus mattress:

- **Spot Clean Only:** The mattress cover is not designed to be removed for washing. Spot clean any spills or stains with a mild detergent and water. Allow to air dry completely.
- **Rotate Regularly:** To ensure even wear and prolong the mattress's lifespan, rotate it 180 degrees every 3-6 months.
- **Use a Mattress Protector:** A mattress protector is highly recommended to shield against spills, stains, and allergens, helping to keep your mattress clean and hygienic.
- **Ensure Proper Support:** Use your mattress on a supportive, flat foundation or bed frame to prevent sagging and maintain its structural integrity.

5. TROUBLESHOOTING

If you encounter any issues with your Zinus mattress, consider the following:

- **Odor upon Unboxing:** A slight odor, often referred to as 'new mattress smell,' is normal and harmless. This typically dissipates within a few days in a well-ventilated room.
- **Incomplete Expansion:** If the mattress has not fully expanded after 72 hours, ensure it is on a flat surface in a warm room. Cooler temperatures can slow down the expansion process.
- **Perceived Firmness:** Memory foam mattresses may feel firmer initially. It can take a few weeks for your body to adjust to the new mattress and for the foam to soften slightly with use.
- **Motion Transfer:** While memory foam is known for minimizing motion transfer, some movement may still be felt. This is generally less pronounced than with traditional spring mattresses.
