7. TROUBLESHOOTING

This section addresses common issues you might encounter with your bunk bed.

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware.	Check and tighten all bolts and screws. Ensure the bed is on a level surface.
Squeaking noises.	Loose connections or friction between wood parts.	Tighten all hardware. Apply a small amount of paraffin wax or silicone spray to contact points between wood components if tightening does not resolve the issue.
Drawers do not slide smoothly.	Obstruction in the drawer slides or misaligned runners.	Empty the drawer and check for any obstructions. Ensure the drawer runners are clean and properly aligned. Lubricate with a silicone spray if needed.
