## 2. SAFETY INSTRUCTIONS

To prevent injury, electric shock, fire, or damage to the product, please observe the following safety precautions:

- Do not exceed the maximum load capacity of 1250W (10A) for the AC outlets.
- This product is for indoor use only. Do not expose to moisture or use in wet environments.

- Do not disassemble, modify, or attempt to repair the device. Contact customer support if service is required.
- Keep away from children and pets.
- Ensure the plug is fully inserted into the wall outlet.
- Avoid running the cord under carpets, furniture, or in high-traffic areas where it could be damaged or create a tripping hazard.
- The built-in 350 Joules surge protector safeguards connected devices from voltage spikes. However, in severe weather conditions, it is advisable to unplug sensitive electronics.

## 6. OPERATION

After proper installation, the PAEWOK Flat Plug Outlet Extender is ready for use.

### Using AC Outlets:

- Plug your devices directly into any of the 4 AC sockets.

- Ensure the total power consumption of all connected AC devices does not exceed 1250W (10A).

## Using USB Charging Ports:

- Connect your USB-A compatible devices to the 2 USB-A ports. Each port provides up to 5V/2.4A.
- Connect your USB-C compatible devices to the 1 USB-C port. This port provides up to 5V/3A.
- The USB ports are designed for charging small electronic devices such as smartphones, tablets, and smartwatches.

## 7. MAINTENANCE

---

To ensure the longevity and proper functioning of your outlet extender, follow these simple maintenance guidelines:

- **Cleaning:** Disconnect the extender from the wall outlet before cleaning. Use a dry, soft cloth to wipe the surface. Do not use liquid cleaners or abrasive materials.
- **Storage:** If not in use for an extended period, unplug the extender and store it in a cool, dry place away from direct sunlight.
- **Cord Care:** Avoid bending or kinking the power cord excessively. Do not place heavy objects on the cord.

## 8. TROUBLESHOOTING

---

If you encounter issues with your PAEWOK Flat Plug Outlet Extender, refer to the following common problems and solutions:

- **No Power to Devices:**
  - Ensure the extender's flat plug is fully inserted into the wall outlet.
  - Check if the wall outlet itself is functioning by plugging in another device.
  - Verify that the total power consumption of connected devices does not exceed 1250W. Overloading can trigger the surge protector.
- **USB Ports Not Charging:**
  - Confirm that your device's charging cable is securely connected to both the extender and your device.
  - Test with a different USB cable or device to rule out cable or device issues.
- **Surge Protection Indicator Off:**
  - If the 'Protected' indicator light is off, it may indicate that the surge protection component has absorbed a significant surge and is no longer providing protection. While the outlets may still provide power, it is recommended to replace the unit for continued surge protection.

If the problem persists after attempting these solutions, please contact customer support.
