SETUP AND ASSEMBLY

Assembly typically requires two people and can be completed in under one hour. Follow the numbered steps provided in the instruction sheet.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.
2. **Assemble Frame:** Connect the side rails to the headboard and footboard sections using the provided bolts and the ratchet hex wrench. Ensure all connections are snug but do not overtighten initially.
3. **Install Center Support:** Attach the center support beam and its legs to the frame.
4. **Place Slats:** Unroll or place the wooden slats across the frame. Ensure they are evenly spaced and secured according to the instructions. The slats are designed to support your mattress directly, eliminating the need for a box spring.
5. **Final Tightening:** Once all components are in place, go back and securely tighten all bolts.
