# OSIM HHR-65AAABU NI-MH AAA Rechargeable Batteries User Manual

Brand: OSIM | Model: bk-65aaabu

## 1. INTRODUCTION

Thank you for choosing OSIM HHR-65AAABU NI-MH AAA Rechargeable Batteries. These high-quality 1.2V 630mAh NiMH batteries are designed to provide reliable and long-lasting power for a wide array of electronic devices. By choosing rechargeable batteries, you contribute to environmental sustainability and enjoy a cost-effective power solution.

## 2. PRODUCT FEATURES

- **Model:** HHR-65AAABU NI-MH Rechargeable Battery.
- **Quantity:** 4pcs NiMH AAA rechargeable batteries per box.
- **Specifications:** Voltage: 1.2V, Capacity: 630mAh, Size: AAA.
- **Compatibility:** Works well with Panasonic cordless phones (e.g., KX-TG10xx, KX-TG823x, KX-TG63xx, KX-TG93xx, KX-TG43xx Series, KX-TH1211/12, KX-TGA101/430/630/930/935), and other brands like VTech BT205662, BK-30AAABU, BK40AAABU, HHR-55AAABU, HHR-75AAA/B, Siemens, Gigaset, Philips, Backgammon, Motorola, Alcatel.
- **Rechargeable & Durable:** Can be recharged up to 2500 times, offering extended battery life and economic efficiency.
- **Low Self-Discharge:** Advanced technology ensures batteries retain charge for longer periods when not in use.
- **Safety and Eco-Friendly:** Made from environmentally friendly materials, free from harmful chemicals like

Mercury (Hg), Cadmium (Cd), and Lead (Pb), reducing heavy metal pollution.

- **Universal Application:** Ideal for everyday household devices such as cordless phones, remote controls, wireless mice, portable audio players, PDAs, shavers, electric toothbrushes, flashlights, toys, and games.

### 3. SETUP & INSTALLATION

To install your OSIM HHR-65AAABU batteries, follow these general steps:

1. Identify the battery compartment on your device (e.g., remote control, cordless phone handset).
2. Open the battery compartment cover.
3. Observe the polarity markings (+ and -) inside the compartment.
4. Insert the OSIM AAA batteries, ensuring the positive (+) and negative (-) ends align correctly with the markings.
5. Close the battery compartment cover securely.

**Initial Use:** Newly purchased NiMH AAA rechargeable batteries are pre-charged and ready for immediate use. For optimal performance and to achieve the full rated capacity, it is recommended to fully charge and discharge the batteries 3-4 times after the first use. This process helps to condition the battery cells.

## 4. OPERATING INSTRUCTIONS

These NiMH batteries are designed for repeated use. Always use a compatible NiMH battery charger to recharge them. Avoid mixing new and old batteries, or different types of batteries, as this can lead to leakage or damage.

The low self-discharge technology ensures that the batteries retain a significant portion of their charge even after extended periods of non-use. This means they are often ready to go when you need them, reducing the need for frequent recharging.

## 5. MAINTENANCE & CARE

- **Storage:** Store batteries in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cleaning:** Keep battery terminals clean. Use a dry cloth to wipe off any dirt or corrosion.
- **Disposal:** Do not dispose of batteries in fire. Do not short-circuit. Always dispose of used batteries responsibly at designated recycling centers to prevent environmental harm.
- **Environmental Impact:** These batteries are free from harmful heavy metals (Hg/Cd/Pb), making them a safer choice for the environment.

## 6. TROUBLESHOOTING

- **Batteries not charging or holding charge:** Ensure you are using a compatible NiMH battery charger. Verify that the batteries are inserted with correct polarity. If the issue persists after 3-4 charge/discharge cycles, the battery may be at the end of its lifespan.
- **"Positive terminals are short or nonexistent":** If you encounter this message or perceive the positive terminals to be short or missing, please contact OSIM customer service. Do not attempt to modify the battery.
- **Device not powering on:** Check battery insertion and ensure the device itself is functioning correctly. Test with another set of known good batteries if possible.

## 7. SPECIFICATIONS

Attribute	Value
Product Dimensions	3.15 x 1.97 x 0.39 inches

Attribute	Value
Item Weight	1.41 ounces
Item Model Number	bk-65aaabu
Battery Type	NiMH (Nickel-Metal Hydride)
Battery Size	AAA
Voltage	1.2V
Capacity	630 Milliamp Hours (mAh)
Number of Batteries	4 AAA batteries required (per pack)
Manufacturer	OSIM
Recommended Uses	Clock, Cordless Telephones, TV Remote, and other compatible electronics
