mcdodo Lightning to 3.5mm Audio Cable + Audio Charger Splitter

Model: CA-2740

INTRODUCTION

The mcdodo 2-in-1 Lightning to 3.5mm Audio Cable + Audio Charger Splitter is designed to enhance your audio experience by allowing simultaneous charging and audio output from your Apple devices. This adapter provides a convenient solution for connecting 3.5mm headphones or auxiliary cables while ensuring your device remains powered. It features a digital audio decoding chip for stable, high-quality sound and supports various functions including calls and wired controls.

PRODUCT FEATURES

- **Simultaneous Audio & Charging:** Listen to music or make calls while charging your iPhone, iPad, or iPod.
- **Broad Compatibility:** Supports iPhone 14, 13, 12, 11, XS, XR, X, 8, 7 series, iPad, and iPod models.
- **Compact and Portable Design:** Small, lightweight, and easy to carry in a backpack or pocket. Features an ABS vacuum UV electroplating process for a metallic texture.
- **High-Definition Calls:** Supports microphone functionality for clear communication without noise or delay.
- **Peak Audio Quality:** Incorporates an advanced digital audio decoding chip for stable speed and excellent sound quality, minimizing external noise.
- **Stable Compatibility:** Self-adapting to the latest iOS models and systems, ensuring no disruptive pop-up windows.
- **Wired Control Support:** Compatible with wired controls on 3.5mm headphones for convenient operation.

PACKAGE CONTENTS

- 1 x mcdodo Lightning to 3.5mm Audio Cable + Audio Charger Splitter

SETUP INSTRUCTIONS

1. **Connect to Apple Device:** Insert the Lightning connector of the mcdodo adapter into the Lightning port of your iPhone, iPad, or iPod. Ensure it is securely connected.
2. **Connect Audio Device:** Plug your 3.5mm headphones, earbuds, or auxiliary cable into the 3.5mm audio jack on the adapter.

3. **Connect Charging Cable:** If you wish to charge simultaneously, connect your Lightning charging cable to the Lightning port on the adapter. Then, connect the other end of your charging cable to a power source.

OPERATING INSTRUCTIONS

Listening to Audio while Charging

Once the adapter is connected to your Apple device, and your audio device (headphones, auxiliary cable) and charging cable are plugged into the adapter, you can play audio from your device. The audio will be routed through the 3.5mm jack, and your device will charge simultaneously.

Making High-Definition Calls

If your 3.5mm headphones include a microphone, you can use the adapter for phone calls. Ensure the headphones are properly connected to the adapter and the adapter to your device. The adapter supports clear communication without interference.

Using Wired Controls

The adapter supports wired control functions (e.g., play/pause, volume adjustment) if your 3.5mm headphones are equipped with them. This allows for convenient control of your media playback.

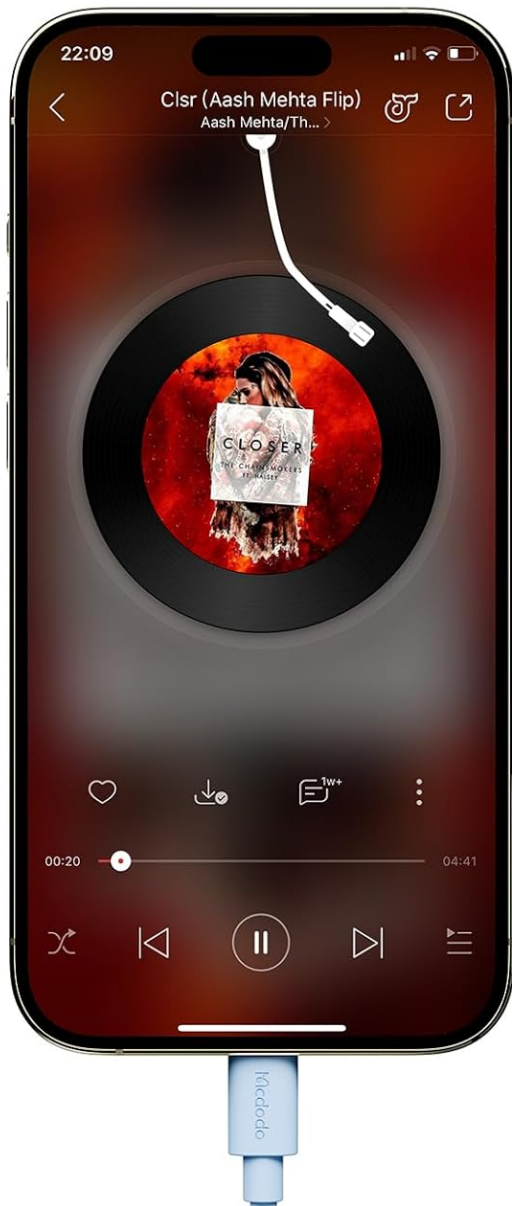

Live Streaming and Online Karaoke

For live broadcasting or online karaoke, you can connect a 3.5mm sound card to the adapter's audio jack. This allows you

to use external audio equipment without worrying about your phone or sound card running out of power.

Easily play with one interface

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the adapter. Avoid using liquid cleaners or solvents.
- **Storage:** Store the adapter in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid excessive bending, twisting, or pulling of the cable to prevent internal damage. Do not drop the adapter.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No audio output	Loose connection, incorrect audio source, faulty headphones.	Ensure all connections (adapter to device, headphones to adapter) are secure. Check device's audio output settings. Test with different headphones or auxiliary cable.
Device not charging	Loose charging cable, faulty charging cable/power source.	Verify the charging cable is firmly connected to both the adapter and the power source. Test with a different Lightning charging cable or power adapter.
Poor audio quality or static	Loose connections, electromagnetic interference, incompatible audio source.	Ensure all connections are secure. Move away from other electronic devices that might cause interference. The adapter features a DAC High Resolution Chip to minimize noise; if issues persist, contact support.
"Accessory not supported" message	Rare compatibility issue or specific iOS version conflict.	The adapter is designed for stable compatibility with iOS. If this message appears, try reconnecting the adapter. Ensure your iOS device is updated. If the issue persists, contact mcdodo customer support.

SPECIFICATIONS

- **Model Number:** CA-2740
- **Brand:** mcdodo
- **Color:** Blue
- **Connector Type:** Lightning (input/charging), 3.5mm Auxiliary (audio output)
- **Number of Ports:** 2 (1x Lightning, 1x 3.5mm)
- **Current Rating:** 1 Amps (for charging)
- **Finish:** ABS (with vacuum UV electroplating)
- **Compatible Devices:** Headphones, mobile phones (iPhone, iPad, iPod with Lightning interface), speakers, car/home audio.
- **Specific Uses:** 2-in-1 adapter for simultaneous audio playback and device charging.
